Summer, Ph. D.,2014-07-03 The author's interest in research of his family roots led him to the conclusion that genealogical charts are the driest of presentations of the family tree In *Legacy of a Patriot* his ancestors interact with each other and with fictional characters The scope of the book covers his family from their time in Germany to the first half of the Twentieth Century and puts flesh on the bones of ancestors and the people they could have encountered along the way In the first five chapters his father and uncle come alive during WWI in the army and in France     Summer by the Seaside Bryant Franklin Tolles,2008 A sweeping richly illustrated architectural study of the large historic New England coastal resort hotels     *The Nineteenth Century*,1880     **The Cumulative Book Index**,1999     **The American Bookseller**,1877     **Small Creatures and Ordinary Places** Allen M. Young,2000-11-07 *Small Creatures and Ordinary Places* reveals to us the beauty and value of hornets bats katydids mice cicadas and other tiny dwellers in our own backyards Young a renowned expert on butterflies and cicadas of the American tropics records in these charming essays his keen observations of the natural world as he walks through an urban woods near the Lake Michigan shore or sits on his deck facing his backyard or gazes at a field of corn stubble in autumn He invites us to venture into our own yards neighborhood parks fields and forests and pause there to look and to listen Small creatures have unique and interesting stories to tell us Young points out Their brief life cycles illustrate the intricate workings of a bigger clock driving the seasons and they dominate the larger web of life in which humans are but a strand Far too often they are ignored taken for granted reviled or misunderstood Even now Young writes as we move into a new millennium as a species and the technological pace of our existence further quickens we can gain much from appreciating nature close at hand despite how steadily it is being pushed aside     **Legacy of My Father** Waverley Traylor,2012-03 Waverley Traylor grew up knowing little about his father's life or what made him tick Yet like life itself time breeds change After his father was unable to obtain the Purple Heart medal for his service in World War II Traylor embarked on a fascinating journey to not only prove his father's qualifications but also to learn more about his father's true identity *Legacy of My Father* is the result of years of research by Traylor who visited family and comrades around the nation extensively read about World War II battles and sorted through thousands of photographs newspapers and letters in order to accurately share his father's compelling life story Presented in three distinct periods this biography describes his father's childhood growing up in pre and post Depression America where he became a well adjusted youth with strong Christian values Later his father was drafted into the US Marines and sent to fight in one of the bloodiest

battles in the history of the Corps Traylor shares heartbreaking details how these events forever changed his father's post war life This moving biography shares the intriguing story of a courageous man haunted by war until his last days on Earth and honors the unique relationship he shared only with his son     The Jaynes Legacy Lawrence Wile, 2018-01-03 Julian Jaynes 1976 book *The Origins of Consciousness in the Breakdown of the Bicameral Mind* continues to arouse an unsettling ambivalence Richard Dawkins called it either complete rubbish or a work of consummate genius nothing in between The present book suggests that the bicameral mind is a phantasm the dating of the origin of consciousness contradicts archeological and literary evidence and the theory contributes nothing toward explaining why some physical states are conscious while others are not because the nonconscious bicameral brain is neurophysiologically equivalent to the conscious brain However the author pays tribute to Jaynes's work as a work of consummate genius because it compels us to re evaluate the significance of humankind's earliest traditions and texts that might shine light on the very suspicious totem of evolutionary mythology that consciousness has evolved continuously and gradually from worms to man The present book suggests that the evolution of the relationship between consciousnesses mass energy and spacetime radically changed nearly 6 000 years ago during the epigenetic evolutionary degeneration of a little known threadlike structure originating from the center of the central nervous system called Reissner's fiber The earliest Egyptian Hebrew Indian and Chinese traditions buried beneath the dust of fallen Babel and thousands of years of distortions and disguisings describe this process during the origin of religion and mystical traditions
