

Sun Protection Policy Guidelines for Schools

Science is facts often being buildings, pillars, reasoning and wisdom. While science may seem like a growing organism, its efforts can feel a bit more. Research shows that children's bodies are more sensitive to sun exposure than adults, and that children's skin is more sensitive to sun exposure than adults. But it can be prevented. Think of it as a shield that people are less prone to skin cancer due to science progress in their skin, but they can still suffer from skin damage.

By implementing a sun protection policy in schools, we can significantly reduce the risk of skin cancer and promote healthier lifestyles among students and staff.

What Schools Can Do

- Establish a strong reputation for sun protection and exposure for school events.
- Children spend most of their school days outdoors during peak sun hours.
- The school gets an initial for sun exposure protection.
- Schools can influence behavior through education.
- Implementing sun protection measures can help create a healthier school environment.

Why Cancer Prevention Education

Education plays a crucial role in preventing skin cancer, given the amount of sun exposure children experience during school activities. The cancer is preventable, especially through education. The sun protection programs aim to:

- Inform teachers' awareness of skin cancer risks and protection measures.
- Change teachers' attitudes about sun protection.
- Encourage responsible decision-making about sun care.
- Educate teachers, parents, teachers, and the school community on skin cancer risks.

Adopt a Sun Protection Policy

A sun protection policy encourages schools to ensure everyone (for students exposed to both staff and teachers) (for students from the sun can harm and damage the skin, and most people are not protected in as little as 15 minutes of sun exposure, especially between 10 AM and 3 PM). Schools should adopt a sun protection policy that:

- provides effective sun protection education.
- minimizes the use of available shade for outdoor activities.
- plans activities to ensure sun exposure during high-risk times.
- includes basic sun protection and safety measures.
- considers sun protection when determining school uniform changes.
- requires teachers to wear protection clothing, including hats, umbrellas.
- provides sunscreen use in outdoor areas.
- encourages parents, teachers, and students to model sun protection behavior.
- informs parents about the school's sun protection policy during activities.

Guidelines on Protection

To ensure effective sun protection, schools should:

- implement broad-based sun protection for the face, neck, and arms.
- consider hats as part of the school uniform.
- encourage sun protection during breaks, lunchtimes, and outdoor activities.
- implement display walls of skin cancer materials with key messages and advice.
- provide for use of SPF30 or higher sunscreen, and educate teachers on its proper application.

Guidelines on School Organization

Schools should ensure activities for students are organized, including:

- holding outdoor activities in shaded areas.
- ensuring sun protection during outdoor physical education and sports.
- scheduling activities around times of high risk of sun.
- applying the sun protection policy in swimming programmes.
- ensuring that teachers are actively supervising water appropriate sun protection.
- requiring suitable hats, clothing, and sunscreen on camps and excursions.
- ensuring proper sun protection behavior by teachers and parents.

Guidelines for the School Environment

To create a healthy school environment, consider:

- ensuring that school grounds are used in relation to shade availability.
- facilitating the development of long-term shade strategies for school grounds.
- identifying possible areas and their reasons for use.
- determining which areas best support shade.
- planning for the construction of shade or planting trees that provide shade.
- temporary shade structures.
- providing shade for high-risk areas for students and teaching staff.

By implementing these guidelines, schools can help protect their students from harmful UV radiation and promote the health and well-being of teachers and staff.
