This is the method of a working professional: the way to interpret, approach, and master whatever lighting situation is thrown at you and always get the shot, no matter what.

Edward Burne-Jones on Nature Liana De Girolami Cheney, 2021-05-21 This volume studies some of Edward Burne-Jones's paintings focusing specifically on his approach to nature both through his observations about the real physical world and through his symbolic interpretations of earthly and celestial realms. Burne-Jones's appreciation for natural formations grew from his interests in astronomy and geography and was expanded by his aesthetic sensibility for physical and metaphysical beauty. His drawings and watercolors carefully recorded the physical world he saw around him. These studies provided the background for a collection of paintings about landscapes with flora and fauna and ignited an artistic furor that inspired the imagery he used in his allegorical fantasy and dream cycles about forests, winding paths, and sweet briar roses. This study focuses on two main ideas: Burne-Jones's concept of ideal and artificial or magical nature expressed and represented in his drawings and paintings, and the way in which he fused his scientific knowledge about nature with some of the symbolism in his paintings.

Increasing critical interest in all aspects of Lowry's life and work prompted the preparation of this complete edition of his poetry, in which the poems are located, identified, dated, arranged, collated, annotated, and explicated by biographical, critical, and textual introductions.
