### Sunak asks stores to cap basic food prices

No 10 in discussions with supermarkets over French-style approach to cost of living crisis

By Edward Maleski and Will Russell

Prime Minister Rishi Sunak is planning to ask supermarkets to cap the prices of basic food items, a move that would be a significant departure from the free market. The government is considering a French-style approach to the cost of living crisis, which has seen food prices rise sharply in recent months. Sunak is expected to announce the plan in the coming weeks, as the government seeks to ease the financial burden on households. The move would involve setting maximum prices for a range of essential food items, including bread, milk, and meat. This approach has been used successfully in France, where it has helped to keep food prices relatively stable despite inflationary pressures. However, critics argue that such controls could lead to shortages and reduced quality of goods. The government is currently in discussions with major supermarket chains to gauge their willingness to participate in the scheme. If the plan is implemented, it could have a significant impact on the food industry and the wider economy.

### Labour vows to get tough on migrant job visas

By Will Russell, Edward Maleski and Will Russell

Labour has vowed to get tough on migrant job visas, a move that would be a significant departure from the current policy. The party has announced that it will introduce a new system of visas for migrants, which would require them to prove that they have a genuine need for the job. This move is part of Labour's broader strategy to address the cost of living crisis, which has seen many households struggle to afford basic necessities. The new system would involve a more rigorous vetting process for migrants, including checks on their financial situation and their ability to support themselves. Labour also plans to increase the fees for migrant job visas, which would further deter those who are unable to pay. The move is expected to be controversial, as it could lead to a reduction in the number of migrants working in the UK. However, Labour argues that it is necessary to ensure that the labour market is fair and that all workers are treated equally.

It foregrounds the discursive and networked basis of sustainability and demonstrates how such media representations connect the home and local community to broader political, social and economic contexts. The book shows how green lifestyle media negotiate issues of sustainability in varying ways, reproducing the logic of existing consumer society while also sometimes providing projections of a more environmentally friendly existence. In this way, the book argues that everyday lifestyles are not an irredeemable problem for environmentalism but an important site of environmental politics.

**Sexism in the City** James Taylor, 2025-02-20 Sexism in the City is the first book to trace the history of women stockbrokers in the United Kingdom from the late nineteenth to the late twentieth centuries. Forgotten pioneers: these businesswomen fought against the odds to establish successful brokerages across the country and in the process challenged society's beliefs about women and money. The book also tells the story of how the nation's stock exchanges denied them membership for generations, mobilizing increasingly desperate arguments to try to justify their exclusion until women finally won the right to join the London Stock Exchange in 1973. Though historians have recently reassessed women's role in the development of capitalism, highlighting their roles as investors and entrepreneurs, they have assumed that because women were not members of stock exchanges, they were not active as financial intermediaries until modern times. By spotlighting the lives and careers of women who worked as stockbrokers outside male monopolized institutions, this book reframes the historical development of finance in several ways. It highlights the extent to which the seemingly gender-neutral institutions and practices of finance were in fact based on gendered ideologies and exclusions. It argues that focusing on institutions only reveals part of the financial ecosystem, meaning that we miss what was happening outside the formal market. And it challenges London-centric interpretations of financial history, asking questions about the financial cultures existing outside the metropolis. If we look

beyond the official exchanges and beyond London a more diverse financial environment comes into view The history uncovered in Sexism in the City also helps to address problems with financial culture in the twenty first century Current reform initiatives are unlikely to succeed unless they acknowledge that for hundreds of years professional identities and institutional structures in finance have been based on the denigration and marginalization of women Acknowledging the efforts of those female stockbrokers who challenged misogynistic beliefs and defied men s monopoly of high finance by forging their own careers is the first step towards imagining a different kind of market
