Direct Social Work Practice Dean H. Hepworth, 2006 Through proven learning experiences that are as close to real life

practice as can be obtained from a book **DIRECT SOCIAL WORK PRACTICE THEORY AND SKILLS** prepares social work students for effective work in the field. Many of the case examples are drawn from social work practitioners as well as the authors' own practice situations. Long praised for its appropriate level of rigor, the book integrates the major theories and skills that direct social work practitioners need to understand and master, thus giving the book its reputation as the classic source for helping students learn direct practice skills. Consisting of four parts, the book begins by identifying the mission of social work, its values, and knowledge base. The authors then differentiate generalist from direct practice and explore roles of direct practitioners. Common elements amongst diverse theorists are then examined while key intervention strategies and various client population and practice settings are presented. Specifically, Part One provides the foundational values and knowledge base material. Part Two is devoted to the beginning phase of the helping process. Part Three addresses the middle phase goal attainment strategies, discussing four intervention approaches, and Part Four clarifies the termination phase of direct practice.

Competency in Generalist Practice Elizabeth Moore Plionis, 2007. *Competency in Generalist Practice* features an original and timely social work practice model that will transform the way generalist and evidence-based practice are taught. Writing with outstanding clarity and sense of purpose, Elizabeth Moore Plionis guides students in the use of a decision tree that will help them take a conscious theory and evidence-based approach to solving the complex problems they will face as social workers. This book is a concise but powerful tool for learning how to become an effective social work practitioner. Presents direct and indirect practice in alternate chapters rather than separate volumes, comparing and contrasting them in an easy-to-grasp manner. Includes chapters on topics rarely found in comparable texts, including professional regulatory and fiduciary responsibilities, case and class advocacy, and service delivery to impoverished families and children. Covers important macro practice skills such as non-clinical communication, crisis management, and the use of groups in policy management and community and social change. Features flow charts, decision schemas, and examples of process recordings that vividly illustrate the material. Incorporates both traditional and new theories into the discussion, linking them to technique and putting them in the context of direct and indirect methods at each step of the decision hierarchy. Supplemented by a companion website that contains slides and a teacher's guide for download.
