Skin Cancer And Uvradiation:

Skin Cancer and UV Radiation Peter Altmeyer, Klaus Hoffmann, Markus Stücker, 2012-12-06 UV radiation is recognized as the major risk factor for skin cancer. For the last three decades the incidence and mortality of skin cancer have been increasing steadily in almost all parts of the world. Unfortunately there have been very few advances in the management and treatment of skin cancer. In comparison to other malignant tumors skin cancer offers the unique opportunity to identify this tumor at an early stage. Thus there is strong interest in preventing death by early diagnosis and prompt treatment. The proceedings of the International Congress on Skin Cancer and UV Radiation which was held in Bochum Germany in October 1996 reflect the newest scientific standards in the field of skin cancer. The conference in Bochum was a platform for leading scientists from all over the world to discuss the complexity and diversity of UV radiation in its interaction with the skin. Starting with basic science like physiology, immunology and molecular biochemistry of the skin as influenced by UV radiation, the book presents a profound survey into the field of skin cancer by focusing on the latest scientific results in prevention, early detection, treatment and epidemiology. The congress in Bochum in 1996 was organized to provide a starting point for coordinated European strategies against skin cancer with internationally renowned scientists. **Exposure to Artificial UV**

Skin Aging & Cancer Ashish Dwivedi, Neeraj Agarwal, Lipika Ray, Amit Kumar Tripathi, 2019-11-17 This book summarizes the potent effect of ultraviolet radiation (UVR) on the photoaging and cancer formation.
