*Skirting Tradition* Lia Larson, 2004      Encyclopedia of Women and American Politics, Third Edition Lynne Ford, 2021-07-01 Encyclopedia of Women and American Politics Third Edition contains all the material a reader needs to understand the role of women throughout America's political history This informative A to Z volume contains hundreds of entries covering the people events and terms involved in the history of women and politics Entries include Abortion Alexandria Ocasio Cortez The birth control movement Black Lives Matter Hillary Rodham Clinton Deb Haaland Domestic violence Equal Rights Amendment ERA Glass ceiling League of Women Voters MeToo movement Michelle Obama Sonia Sotomayor Elizabeth Warren and many more      **New Books on Women and Feminism**, 2005      *Harvard Political Review*, 2004      Book Review Index, 2006 Every 3rd issue is a quarterly cumulation      Feminism and Modernity in Anglophone African Women's Writing Dobrota Pucherová, 2022-07-29 This book re-reads the last 60 years of Anglophone African women's writing from a transnational and trans historical feminist perspective rather than postcolonial from which these texts have been traditionally interpreted Such a comparative frame throws into relief patterns across time and space that make it possible to situate this writing as an integral part of women's literary history Revisiting this literature in a comparative context with Western women writers since the 18th century the author highlights how invocations of tradition have been used by patriarchy everywhere to subjugate women the similarities between women's struggles worldwide and the feminist imagination it produced The author argues that in the 21st century African feminism has undergone a major epistemic shift from a culturally exclusive to a relational feminism that conceptualizes African femininity through the risky opening of oneself to otherness transculturation and translation Like Western feminists in the 1960s contemporary African women writers are turning their attention to the female body as the prime site of women's oppression and freedom reframing feminism as a demand for universal human rights and actively shaping global discourses on gender modernity and democracy The book will be of interest to students and researchers of African literature but also feminist literary scholars and comparatists more generally      *Income Generating Activities with Women's Participation* Marilyn W. **Collected Essays No. 2 by Salar Bil** Salar Bil, *Collected Essays No 2* by Salar Bil is a 2025 anthology that brings together a series of writings exploring the intersections of fashion technology media ideology and the future of fashion and fashion's philosophy reimagining fashion history in the process Composed in Tehran the essays offer a critical and culturally grounded examination of these themes through a distinct intellectual lens      Appropriately Subversive Tova Hartman Halbertal, 2002 The author interviewed mothers of teenage daughters in religious communities Catholic in the USA and Orthodox Jews in Israel to find out how to reconcile conflicting loyalties      ,      *Wild Science* Janine Marchessault, Kim Sawchuk, 2013-10-18 *Wild Science* investigates the world wide boom in health culture While self help health books and medical dramas are popular around the globe we are bombarded with daily media images of DNA research and news reports

about cloning the fight against AIDS cancer and depression With popular culture now the principal means through which the non scientific population encounters science why do certain images of science get promoted above others Contributors examine the public meanings of science revealing the frictions and contradictions within popular representations of what medicine can and should do Focusing on the visual culture of medicine they show how representations of science have a direct impact on popular perceptions of the limits of science and ultimately on health education funding and research and examine the belief that media literacy in popular representations of medicine makes an ethical public discourse on the aims of science possible With sections addressing the new visual technologies which make the human body into a virtual territory the diagnostic and medical practices centered around women s bodies and popular debates around genetics and identity Wild Science argues that science is a practice bound in values and institutions and argues for a responsible engagement with the public cultures of science and health
