Sky Guardians Britains Air Defence 1918 1993:

The History of Air Intercept Radar & the British Nightfighter 1935-1959 Ian White, 2007-05-30 This detailed history of Air Intercept radar traces the development of this vital military technology with the Royal Air Force during WWII In the years after World War I the United Kingdom was desperate to develop some form of protection from an enemy air strike As early as 1923 the British Army had devised sound mirrors that could detect aircraft up to twelve miles away This technical history traces the development of military radar technology from this early experimental phase to the creation of the first air to air radar systems and their uses in battle Historian Ian White sets this fascinating narrative within the larger political military economic and technological context of the era Through World War II Air Intercept radar was a vital asset in protecting RAF bomber forces as well as the country itself But developing the technology required the tireless work of physicists and engineers in the Air Ministry Research Establishment particularly members of the Establishment s Airborne Group working under Dr Edward Bowen Their Airborne Interception radars such as the AI Mk IV were used in Blenheim night fighters during the winter Blitz and by Mosquito during the Baedeker Raids This in depth history covers the introduction of centimetric technology at the Telecommunications Research Establishment the creation of centimetric AI and their installation in the Beaufighter and later marks of the Mosquito It describes the creation of the Radiation Laboratory at MIT and concludes with a section on further developments during the Cold War

British Imperial Air Power Alex M Spencer, 2020-06-15 British Imperial Air Power examines the air defense of Australia and New Zealand during the interwar period It also demonstrates the difficulty of applying new military aviation technology to the defense of the global Empire and provides insight into the nature of the political relationship between the Pacific Dominions and Britain Following World War I both Dominions sought greater independence in defense and foreign policy Public aversion to military matters and the economic dislocation resulting from the war and later the Depression left little money that could be provided for their respective air forces As a result the Empire s air services spent the entire interwar period attempting to create a strategy in the face of these handicaps In order to survive the British Empire s military air forces offered themselves as a practical and economical third option in the defense of Britain s global Empire intending to replace the Royal Navy and British Army as the traditional pillars of imperial defense

In Turbulent Skies Peter Reese, 2020-01-24 In 1945 confidence in British aviation was sky high Yet decades later the industry had not lived up to its potential What happened The years that followed the war saw the Brabazon Committee issue flawed proposals for civil aviation planning Enforced cancellations restricted the advancement of military aircraft compounded later on by Defence Minister Duncan Sandys abandoning aircraft to fixate solely on missiles Commercially Britain s small and neglected domestic market hindered the development of civilian airliners In the production of notorious aircraft the inauspicious Comet came from de Havilland s attempts to gain an edge over its American competitors The iconic Harrier jump jet and an indigenous crop of helicopters were squandered while unrealistic

performance requirements brought about the cancellation of TSR2 Peter Reese explores how repeated financial crises a lack of rigour and fatal self satisfaction led British aviation to miss vital opportunities across this turbulent period in Britain s skies

Land Based Air Power or Aircraft Carriers? Gjert Lage Dyndal,2016-04-22 During the 1960s in the midst of its retreat from empire the British government had to grapple with complex political and military problems in order to find a strategic defence policy that was both credible and affordable Addressing what was perhaps the most contentious issue within those debates this book charts the arguments that raged between supporters of a land based air power strategy and those who favoured aircraft carriers Drawing upon a wealth of previously classified documents the book reveals how the Admiralty and Air Ministry became interlocked in a bitter political struggle over which of their military strategies could best meet Britain s future foreign policy challenges Whilst the broad story of this inter service rivalry is well known the Air Force s proposal for a series of island based airfields and the Navy championing of a small number of expensive but mobile aircraft carriers the complexity and previous lack of archival sources means that it has until now only ever been partially researched and understood Former studies have largely focused on the cancellation of the CVA 01 carrier programme and offered little depth as regards the Royal Air Force perspectives Given that this was a two Service rivalry which greatly influenced many aspects of British foreign and defence policy decisions of the period this book presents an important and balanced overview of the complex issues involved Through this historical study of the British debate about maritime air power and strategic alternatives in the 1960s the detailed arguments used for and against both alternatives demonstrate clear relevance to both historical and contemporary conceptual debates on carrier forces and land based air power Both from military strategy and inter service relationship perspectives contemporary Britain and many other nations with maritime forces may learn much from this historical case

Warfare in Europe 1919-1938 Geoffrey Jensen,2017-05-15 Although ostensibly a time of peace one of the richest and most fascinating periods in military history falls between the two world wars With good reason even today military theorists look to these years for relevant lessons The articles and papers collected together in this volume highlight the major themes and developments of interwar military affairs in Europe including the new doctrines of tank warfare air power German Blitzkrieg and Soviet operational art They also demonstrate the important place of the major armed conflicts of the period such as the Russian and Spanish Civil Wars in European history

The Bristol Blenheim Graham Warner,2005 This is a truly comprehensive account of the Blenheim s origins development and operational history

The Compact Timeline of Aviation History Anthony A. Evans,David Gibbons,2008 The Compact Timeline of Aviation History encompasses the entire history of flight from the days of legends balloons and gliders to the latest high tech aircraft

Air Power History Sebastian Cox,Peter Gray,2013-11-05 he 20th century saw air power transformed from novelists fantasy into stark reality From string and canvas to precision weaponry and stealth air power has progressed to become not only the weapon of first political choice but often the only conceivable option This rapid development has given rise to

considerable debate and controversy with those holding entrenched views rarely slow to shout their case Many myths have grown over the period ranging from the once much vaunted ability of air power to win wars alone through to its impact as a coercive tool This volume examines the theory and practice of air power from its earliest inception The contributors have been drawn from academia and the military and represent some of the world s leading proponents on the subject All significant eras on air power employment are examined some are evidently turning points while others represent continuous development Perhaps more importantly the book highlights the areas that could be considered to be significant and invites the reader to enter the debate as to whether it constitutes a continuum a turning point or indeed a revolution Sky
