Chinese Urban Design Fei Chen, Kevin Thwaites, 2018-01-12 The traditional Chinese city is undergoing an identity crisis With the rapid development taking place there is growing conflict between this new building and the existing urban heritage An appropriate approach both in design and in legislation is urgently needed to deal with this problem Furthermore although Chinese cities have a remarkably long history existing methods of urban form study in China are either descriptive or loosely structured whereas a comprehensive methodology is necessary to read Chinese urban forms in a consistent way and thus inform designers and policy makers Chinese Urban Design targets these problems and offers an analytic and conceptual framework for both urban investigation and consequent design Firstly summarising traditional urban design principles and how Chinese cities have transformed over time it then introduces and offers a theoretic ground and scientific methodology for understanding the evolution of urban forms initially developed in western countries It demonstrates the theoretic model via real cases from the city of Nanjing and establishes a direct link between understanding of urban forms and design development By providing a cross cultural investigation on the theories and methods of urban typology and morphology this book aims to suggest best future practice for urban design in China It explores how urban designers and local policy makers can produce culturally responsive designs and how they might better understand the formation and transformation of the built environment in which their creations sit It also looks at how local residents lifestyle culture and demands might be reflected and respected in design process
