Small Nations Giant Firms:

Small Nations, Giant Firms Louis Wolf Goodman, 1985 *Small Nations, Giant Firms* Louis Wolf Goodman, 1987 Big Business and the Wealth of Nations Alfred D. Chandler, Franco Amatori, Takashi Hikino, 1997 Written in nontechnical terms *Big Business and the Wealth of Nations* explains how the dynamics of big business have influenced national and international economies in the twentieth century A path breaking study it provides the first systematic treatment of big business in advanced emerging and centrally planned economies from the late nineteenth century when big businesses first appeared in American and West European manufacturing to the present These essays written by internationally known historians and economists help one to understand the essential role and functions of big businesses past and present **The Extent of Singapore's Investments Abroad** Samuel Bassey Okposin, 2019-01-04 First published in 1999 this volume explores extreme openness of the Singaporean economy to international trade through the role of Foreign Direct Investment in Singapore and Singapore's investments abroad It provides much valuable insight to how changes in the economic and policy environments impacted on the individual Singapore based firms and their decision making processes The book is particularly strong in the manner in which the firm level material is linked to the overall outflow of capital the macro level conditions and the established theoretical explanations for the export of capital Samuel Bassey Okposin has four aims to examine the causes of direct investment in Singapore's economy to investigate the motivation for Singapore firms to invest abroad to explain overseas direct investment from Singapore and to examine Singapore's overseas direct investment strategies strengths and weaknesses considering if the current trend of outward direct investment will continue into the new millennium *Rival States, Rival Firms* John M. Stopford, Susan Strange, John S. Henley, 1991-10-17 In this theoretically original work two distinguished authors explore the mutual interdependence of states and firms throughout the world They show how global structural changes in finance technology knowledge and politics often impel governments to seek the help and cooperation of managers of multinational enterprises Yet as Professors Stopford and Strange demonstrate this is constrained by each country's economic resources its social structures and its political history Based on grass roots research into the experience of over 50 multinationals and more than 100 investment projects in three developing countries Brazil Malaysia and Kenya the authors develop a matrix of agendas They present the impact on projects of the multiple factors affecting the bargaining relationships between the government and the foreign firm at different times and in a variety of economic sectors In conclusion they offer some guidelines for actions to both governments and firms and some points to future interdisciplinary research Global Strategic Management Jędrzej George Frynas, Kamel Mellahi, 2015 Emphasising the essential techniques of business best practices this title offers thorough analysis and discussions on concepts such as environmental analysis strategy development and strategy implementation **Standing On The Shoulders Of International Business Giants: In Memory Of Yair Aharoni** Arie Y Lewin, Ravi Ramamurti, Elizabeth L Rose, 2024-03-04 This book serves as an introductory

volume to Yair Aharoni's remarkable impact on international business IB research. Most IB researchers will be familiar with at least one aspect of his work but relatively few will be familiar with his broader body of work as it spans so many of the issues addressed today in IB and strategy. This book aims to introduce readers to the depth and breadth of his impact. Unquestionably a founder of the IB field over the course of his long career, Aharoni influenced its earliest development and driven by a deep connection to policy and managerial practice continually challenged conventional thinking on IB and strategy. He generated seminal insights into many aspects of why and how firms internationalize including managerial decision making processes, the strategies employed by state-owned enterprises, the interaction between firms and governments and the foreign expansion of firms including small and medium-sized enterprises, SMEs and those operating in the service sector based in small and open economies. His research contributed to several salient research directions including the behavioral theory of the firm, emerging market multinationals, international entrepreneurship, the service economy and non-market strategies. Aharoni was also an influential educator having served as the founding dean of two top business schools in Israel. He was deeply engaged with the Israeli business environment particularly senior executives of start-up companies and a highly valued advisor to the Israeli government. In honor of these contributions, Aharoni was the first management scholar in Israel to be awarded the prestigious Israel Prize in 2010. Few scholars have had such meaningful impact on research practice and policy.

Big Is Beautiful Robert D. Atkinson, Michael Lind, 2019-02-26. Why small business is not the basis of American prosperity, not the foundation of American democracy and not the champion of job creation. In this provocative book, Robert Atkinson and Michael Lind argue that small business is not as widely claimed the basis of American prosperity. Small business is not responsible for most of the country's job creation and innovation. American democracy does not depend on the existence of brave bands of self-employed citizens. Small businesses are not systematically discriminated against by government policy makers. Rather, Atkinson and Lind argue, small businesses are not the font of jobs because most small businesses fail. The only kind of small firm that contributes to technological innovation is the technological start-up and its success depends on scaling up. The idea that self-employed citizens are the foundation of democracy is a relic of Jeffersonian dreams of an agrarian society. And governments motivated by a confused mix of populist and free market ideology in fact go out of their way to promote small business. Every modern president has sung the praises of small business and every modern president according to Atkinson and Lind has been wrong. Pointing to the advantages of scale for job creation, productivity, innovation and virtually all other economic benefits, Atkinson and Lind argue for a size-neutral policy approach both in the United States and around the world that would encourage growth rather than enshrine an anachronism. If we overthrow the small is beautiful ideology, we will be able to recognize large firms as the engines of progress and prosperity that they are.
