The second section has annotated bibliographies that describe each title and includes publication information and awards won. Walking Isn't Everything was written by Jean Denecke about her experience of living with polio. This book discusses what it was like to get polio, her experiences with various hospitals and doctors, and her experience in the Roosevelt Foundation facility in Warm Springs, Georgia. Giving a glimpse of how the delivery of medical services has changed since the polio epidemics of the early 1950s, the book describes what it was like to be a woman with a disability in that era. Even though she was hospitalized for a long time, after going to Warm Springs, she was able to return to her home where she continued in her role as a wife and mother and later started her own business. *Walking Isn't Everything* is more than just a biography of one remarkable woman; it is a story of courage, determination, and love. *The Conquest of Viruses* Van G. Wilson, 2025-03-27

This book guides through the fascinating history of viral vaccines from the first primitive smallpox vaccination in the 18th century to the cutting-edge RSV formulation approved in 2023. Each chapter delves into the scientific, clinical, and social forces that led to the development of these life-saving medical innovations, highlighting the scientists who played pivotal roles. With a focus on making complex science accessible and history engaging, this book offers a comprehensive portrayal of virology, vaccinology, and the interplay between science and society in shaping public health. Readers will explore key concepts such as the evolution of vaccine technology over time, from cowpox material to mRNA vaccines, and a wide array of other topics, including the eradication of diseases through vaccines, the challenges of immunization against influenza, and the revolutionary impact of COVID-19 vaccination. The author, microbiologist Professor Wilson, provides expert analysis on how sociological factors influenced vaccine progress and gets to the bottom of the question of why there is still no vaccine for some critical diseases. This book is a must-read for anyone with an interest in viruses and vaccines. Whether you're a researcher or simply fascinated by medical history, this book promises to be both informative and entertaining.
