Gasparski, Timo Airaksinen, 2021-10-18 Technology is a crucial feature of the modern world and human beings are necessarily technological creatures Our goal must be to use technology effectively efficiently and ethically We have hands that are adept at using tools and intelligence that guides our actions We also have desires and emotions that motivate us to achieve more and more never allowing us to stop From the viewpoint of praxiology technology does not exist merely to satisfy the human need in an effective and efficient way The problems of the modern world and the questions we must ask with respect to technology and how it is used are complicated and demanding They may initially seem mysterious perhaps even partly subconscious In this fifteenth volume of a distinguished international series contributors address essential questions about the philosophy and ethics of technology Their intention is to point out the road not only to its better applications but also to its greater understanding The first part of the book addresses general questions about the theory of technology The second part of the volume focuses on special topics like information and communication technologies and work systems as well as the foundations of problem solving and the history of innovation in the age of enlightenment The third part of the book is on ethical judgments It emphasizes the importance of ethics in the application of technology and especially when we commercialize it in order to meet the needs of the people in a free market society This volume offers its reader a balanced

picture of the state of the art of theoretical and applied issues in technology research emphasizing the praxiological perspective that characterizes the entire series **Blockchain and Applications** Javier Prieto,Alberto Partida,Paulo Leitão,António Pinto,2021-09-02 This book constitutes the refereed proceedings of the 1st International Congress on Blockchain and Applications 2021 BLOCKCHAIN 21 held in Salamanca Spain in October 2021 Among the scientific community blockchain and artificial intelligence are a promising combination that will transform the production and manufacturing industry media finance insurance e government etc Nevertheless there is no consensus with schemes or best practices that would specify how blockchain and artificial intelligence should be used together The 38 full papers presented were carefully reviewed and selected from over 44 submissions They contain the latest advances on blockchain and artificial intelligence and on their application domains exploring innovative ideas guidelines theories models technologies and tools and identifying critical issues and challenges that researchers and practitioners must deal with in future research
