**The Suicidal Adolescent** Moses Laufer, 2018-05-08 As our knowledge of the change and turmoil of adolescence grows so the number of issues on which psychotherapeutic techniques can shed light increases this monograph focuses on one of the most urgent It provides not only practical insights into dealing with suicidal or potentially suicidal adolescents with an emphasis on prevention of the problem as early as possible but also a model of the way in which adolescents may find themselves becoming suicidal Suicide attempts are rare in childhood they are generally triggered after puberty by the adolescent's reaction to changes in his newly sexually mature body It is the body that is perceived as the enemy and sometimes the death of the body seems the only recourse The adolescent who actually attempts to kill himself no longer doubts his actions or his solutions on his mental creations At the time of his decision to kill himself he is taken over by his need for peace more than by the fact of his own death
