Suicide Clinical And Epidemiological Studies:

Suicide Brian Barraclough,1987 **Clinical and Epidemiological Studies on Suicide** ,1985 **Epidemiology and clinical researches on neuropsychiatric disorders in aging** Wuxiang Xie,Bao-Liang Zhong,Lirong Liang,Yutong Samuel Cai,2023-02-28 **Suicide Across The Life Span** Judith M. Stillion,Eugene E. McDowell,2015-12-03 First published in 1996 The complexities of suicide are examined from the developmental viewpoint The text includes appropriate case studies and three research studies which were conducted especially for this work *Suicide - The Ultimate Rejection?* Pritchard,1995-10-01 This book looks at suicide in a cross cultural context showing how it is differently understood in different ethnic groups reflecting various degrees of stigma It argues for greater recognition of these key differences between cultures and ethnic groups and shows how important they can be to our understanding and intervention as well as considering the practical and moral issues raised by euthanasia *Life Span Perspectives of Suicide* A.A. Leenaars,1991-01-31 In recent years a great deal of interest has been focused on suicide in the elderly and in the young However in line with modern trends in psychology sociology psychiatry anthropology and other human health fields interest has now shifted to suicide across the life span from childhood through adulthood to old age This book has been conceptualized within this developing tradition There are various ways in which life s timelines can be conceptualized Developmental theory we believe should be open ended This has widened and will continue to widen our understanding of many complicated human acts including suicide Though suicide is in many ways the same across the entire life span understanding the time lines in the suicidal process is imperative To do so however is we believe challenging In this volume we attempt to engage in the process of understanding suicide from a developmental perspective To do this we have been fortunate to obtain the cooperation of a highly competent group of contributors One interesting footnote to our list of authorities is that they represent suicidologists from across the life span a few who are at the beginning of their careers a large number in their middle years and a few who are in the Indian summer of their professional lives *Suicides in Prison* Alison Liebling,2002-09-11 The suicide rate in prisons in England and Wales is 40 per 100 000 four times that of the general population How can this be explained Recent prison suicides have aroused much public concern and media attention yet there has been very little research examining their true cause or nature Previous studies have tended to rely exclusively on official statistics and prison records and have had little effect in practice *Suicides in Prison* is the first major study in this area to draw directly on the experiences of both prisoners and staff The interviews conducted by the author help to cast new light on the circumstances which can lead to suicide or attempted suicide The author provides further evidence to support the growing recognition that suicide is not an exclusively psychiatric problem The coping mechanisms and social support given to the people involved can have a crucial role to play Alison Liebling also shows how serious difficulties in the management of prisoners at risk of suicide may be exacerbated by problems of communication between departments and

that prison officers may lack the necessary training to play a potentially major role in suicide prevention Most importantly if staff perceptions and attitudes are not addressed any attempt to improve procedures may well be ineffective Suicides in Prison traces the recent history of the problem and provides the first major theoretical discussion of the nature and causes of suicide in prison *Core Psychiatry E-Book* Padraig Wright, Julian Stern, Michael Phelan, 2012-01-08 A new edition of a

highly successful award winning textbook for trainee psychiatrists covering in one volume all the subjects required for the new MRCPsych and similar exams Written in a highly engaging manner it will also prove invaluable to qualified psychiatrists who need to keep up to date with the latest developments as well as clinical psychologists general practitioners psychiatric nurses and senior medical students Concise yet comprehensive *Core Psychiatry* reflects the latest developments in the curriculum plus all that is new and essential in clinical practice and the sciences that underpin it It includes new information on the new Mental Capacity Act and Mental Health Act as well as enhanced sections on psychopharmacology old age psychiatry child and adolescent psychiatry forensic psychiatry and rehabilitation The book also makes reference to the latest NICE guidelines and includes new sections on sleep medicine and trauma psychiatry New edition of a popular MRCPsych curriculum based text Previous edition Highly Commended Mental Health category in the BMA Awards 2005 Contains useful summary boxes lists and key points to make last minute learning easy Comprehensive and authoritative resource written by contributors to ensure complete accuracy and currency of specialist information Chapters prepared by specialists working in conjunction with trainees content totally up to date and jointly written by authors who have recently been in the exam situation Contains the latest findings in sleep medicine and trauma psychiatry Expanded section on psychology including social psychology to reflect the latest MRCPsych examination format Text updated in full to reflect the new Mental Capacity Act and Mental Health Act Relevant chapters now contain a skills and competency section to reflect changes in MRCPsych curriculum Updating and amendments to improve coverage of old age psychiatry child and adolescent psychiatry forensic psychiatry and rehabilitation Contains reference to the latest NICE guidelines in boxes and tables Enhanced discussion of the use of the best current management options both pharmacological and psychotherapeutic the latter including CBT DBT EMDR and psychodynamic group couple and family therapy **The Oxford Handbook of Suicide and Self-Injury**

Matthew K. Nock, 2014-05-08 Suicide is a perplexing human behavior that remains among the leading causes of death worldwide responsible for more deaths each year than all wars genocide and homicide combined Although suicide and other forms of self injury have baffled scholars and clinicians for thousands of years the past few decades have brought significant leaps in our understanding of these behaviors This volume provides a comprehensive summary of the most important and exciting advances in our understanding of suicide and self injury and our ability to predict and prevent it Comprised of a formidable who s who in the field the handbook covers the full spectrum of topics in suicide and self injury across the lifespan including the classification of different self injurious behaviors epidemiology assessment techniques and intervention

Chapters probe relevant issues in our society surrounding suicide including assisted suicide and euthanasia suicide terrorism overlap between suicidal behavior and interpersonal violence ethical considerations for suicide researchers and current knowledge on survivors of suicide The most comprehensive handbook on suicide and self injury to date this volume is a must read text for graduate students fellows academic and research psychologists and other researchers working in the brain and behavioral sciences *Biomedical Index to PHS-supported Research* ,1991
