The Zoomorphic Imagination in Chinese Art and Culture Jerome Silbergeld, Eugene Y. Wang, 2016-10-31 China has an age old zoomorphic tradition The First Emperor was famously said to have had the heart of a tiger and a wolf The names of foreign tribes were traditionally written with characters that included animal radicals In modern times the communist government frequently referred to Nationalists as running dogs and President Xi Jinping vowing to quell corruption at all levels pledged to capture both the tigers and the flies Splendidly illustrated with works ranging from Bronze Age vessels to twentieth century conceptual pieces this volume is a wide ranging look at zoomorphic and anthropomorphic imagery in Chinese art The contributors leading scholars in Chinese art history and related fields consider depictions of animals not as simple one for one symbolic equivalents they pursue in depth in complexity and in multiple dimensions the ways that Chinese have used animals from earliest times to the present day to represent and rhetorically stage complex ideas about the world around them examining what this means about China past and present In each chapter a specific example or theme based on real or mythic creatures is derived from religious political or other sources providing the detailed and learned examination needed to understand the means by which such imagery was embedded in Chinese cultural life Bronze Age taotie motifs calendrical animals zoomorphic modes in Tantric Buddhist art Song dragons and their painters animal rebuses Heaven sent auspicious horses and foreign sent tribute giraffes the fantastic specimens depicted in the Qing Manual of Sea Oddities the weirdly indeterminate creatures found in the contemporary art of Huang Yong Ping these and other notable examples reveal Chinese attitudes over time toward the animal realm explore Chinese psychology and patterns of imagination and explain some of the critical means and motives of Chinese visual culture The Zoomorphic Imagination in Chinese Art and Culture will find a ready audience among East Asian art and visual culture specialists and those with an interest in literary or visual rhetoric Contributors Sarah Allan Qianshen Bai Susan Bush Daniel Greenberg Carmelita Carma Hinton Judy Chungwa Ho Kristina Kleutghen Kathryn Liscomb Jennifer Purtle Jerome Silbergeld Henrik S rensen and Eugene Y Wang

Chinese Wood Sculptures of the 11th to 13th centuries Petra Rösch, 2007-11-16 Chinese Buddhist wooden sculptures of Water moon Guanyin a Bodhisattva sitting in a leisurely reclining pose on a rocky throne are housed in Western collections and are thus removed from their original context's Not only are most of them of unknown origin but also lack a precise date Tracing their sources is difficult because of the scant information provided by art dealers in previous periods Thus only preliminary investigations into their stylistic development and technical features have been made so far Moreover until recently none of the Chinese temples that provided their original context i e their precise position within those temple compounds and their respective place in the Buddhist pantheon have been examined at all In her study Petra H R sch investigates these very aspects including questions about the religious position and function of the sculptures of this special Bodhisattva She also looks at the technical construction the collecting of Chinese Buddhist sculptures in general and those made of wood in particular She uses a combination of stylistic iconographical buddhological as well as technical methodologies in her investigation of the Water moon Guanyin images and sheds light on the Buddhist temples in Shanxi Province the works of art they once housed and the religious practices of the eleventh to thirteenth centuries connected with them

The Making of a Savior Bodhisattva Shi Zhiru, 2007-08-14 In modern Chinese Buddhism Dizang is especially popular as the sovereign of the underworld Often represented as a monk wearing a royal crown Dizang helps the deceased faithful navigate the complex underworld bureaucracy avert the punitive terrors of hell and

arrive at the happy realm of rebirth The author is concerned with the formative period of this important Buddhist deity before his underworldly aspect eclipses his connections to other religious expressions and at a time when the art mythology practices and texts of his cult were still replete with possibilities She begins by problematizing the reigning model of Dizang one that proposes an evolution of gradual sinicization and increasing vulgarization of a relatively unknown Indian bodhisattva Ksitigarbha into a Chinese deity of the underworld Such a model the author argues obscures the many faceted personality and iconography of Dizang Rejecting it she deploys a broad array of materials art epigraphy ritual texts scripture and narrative literature to recomplexify Dizang and restore as much as possible from the fragmented historical sources what this figure meant to Chinese Buddhists from the sixth to tenth centuries Rather than privilege any one genre of evidence the author treats both material artifacts and literary works canonical and noncanonical sources Adopting an archaeological approach she excavates motifs from and finds resonances across disparate genres to paint a vibrant detailed picture of the medieval Dizang cult Through her analysis the cult far from being an isolated phenomenon is revealed as integrally woven into the entire fabric of Chinese Buddhism functioning as a kaleidoscopic lens encompassing a multivalent religio cultural assimilation that resists the usual bifurcation of doctrine and practice or elite and popular religion *The Making of a Savior Bodhisattva* presents a fascinating wealth of material on the personality iconography and lore associated with the medieval Dizang It elucidates the complex cultural religious and social forces shaping the florescence of this savior cult in Tang China while simultaneously addressing several broader theoretical issues that have preoccupied the field Zhiru not only questions the use of sinicization as a lens through which to view Chinese Buddhist history she also brings both canonical and noncanonical literature into dialogue with a body of archaeological remains that has been ignored in the study of East Asian Buddhism

Accounts and Images of Six Kannon in Japan Sherry D. Fowler, 2016-11-30

Buddhists around the world celebrate the benefits of worshipping Kannon Avalokite vara a compassionate savior who is one of the most beloved in the Buddhist pantheon When Kannon appears in multiple manifestations the deity's powers are believed to increase to even greater heights This concept generated several cults throughout history among the most significant is the cult of the Six Kannon which began in Japan in the tenth century and remained prominent through the sixteenth century In this ambitious work Sherry Fowler examines the development of the Japanese Six Kannon cult its sculptures and paintings and its transition to the Thirty three Kannon cult which remains active to this day An exemplar of Six Kannon imagery is the complete set of life size wooden sculptures made in 1224 and housed at the Kyoto temple Daih onji This set along with others is analyzed to demonstrate how Six Kannon worship impacted Buddhist practice Employing a diachronic approach Fowler presents case studies beginning in the eleventh century to reinstate a context for sets of Six Kannon the majority of which have been lost or scattered and thus illuminates the vibrancy magnitude and distribution of the cult and enhances our knowledge of religious image making in Japan Kannon's role in assisting beings trapped in the six

paths of transmigration is a well documented catalyst for the selection of the number six but there are other significant themes at work Six Kannon worship includes significant foci on worldly concerns such as childbirth and animal husbandry ties between text and image and numerous correlations with Shinto kami groups of six While making groups of Kannon visible Fowler explores the fluidity of numerical deity categorizations and the attempts to quantify the invisible Moreover her investigation reveals Kyushu as an especially active site in the history of the Six Kannon cult Much as Kannon images once functioned to attract worshippers their presentation in this book will entice contemporary readers to revisit their assumptions about East Asia's most popular Buddhist deity

The Sinister Way Richard von Glahn, 2004-04-20 Annotation A survey of Chinese religion from 1000 BC to the beginning of the 20th century as well as a study of the ambiguities of divine power in Chinese religion

Dougong Alexandra Harrer, 2025-07-31 This is the first English language study devoted to dougong the block bracket cluster widely regarded as the epitome of traditional Chinese architecture For almost two millennia dougong have been central to the multipartite frame structure of wooden buildings connecting columns with beams supporting projecting eaves and providing resistance to earthquake damage They have enabled and required builders to ensure both the functionality and the moral dimension of their designs through the thoughtful use of appropriately graded timbers and corresponding methods of modular design that determine the size and quality of a building in keeping with the social standing of its owner Richly illustrated with original high quality photographs and drawings this book explores the engaging story of dougong as technical artifacts that embody Chinese culture Alexandra Harrer delves into the previously unresolved relationship between standard dougong and their regional and local variations in the rhetoric of Chinese construction offering an alternative to sociopolitical caste as a means of interpreting these differences She untangles the lengthy selection process and trial and error development of the block bracket cluster before codification to reveal how design idiosyncrasies derived from an unlikely combination of legal codes and ethical imperatives For example dougong with arms projecting at a 45 or 60 degree angle from the wall plane long dismissed as unorthodox are shown to be a subtle design expression that yields to authority while it seeks to exploit archaic cultural standards Harrer argues that the ethical dimensions of graphic shapes and the culturally charged space that dougong occupy are key to understanding this creative process

worldviews of users through multiple cycles of revival restoration and recreation As hybrid spaces that are at once natural and artificial they embody the interaction of art and the environment over a long period of time This far ranging study of cave temples in Sichuan shows that they are part of the world s sustainable future as their continued presence is a reminder of the urgency to preserve culture as part of today s response to climate change Temples in the Cliffside brings art history into close dialogue with current discourse on environmental issues and contributes to a new understanding of the ecological impact of artistic monuments
