

Death of a Sun-Like Star

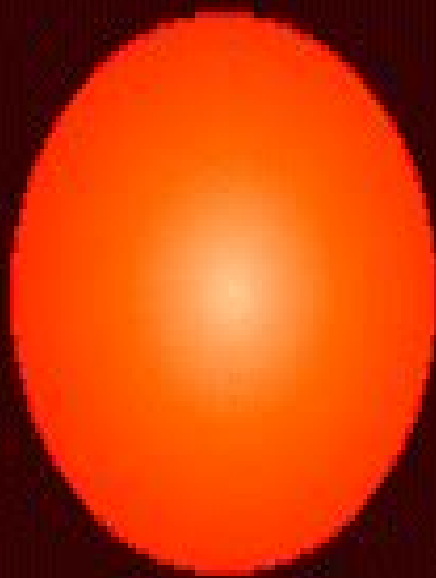

**Sun-Like
Star**

This is the longest, most stable period of a star's life. It converts hydrogen to helium in its core, generating heat and light.

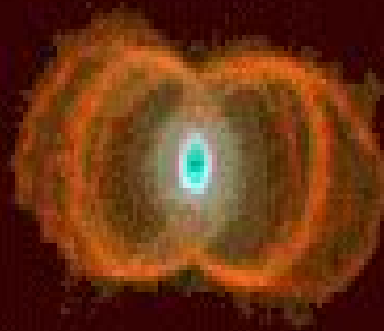

**Red
Giant**

As the nuclear fuel becomes depleted, the core contracts and the outer layers expand.

**Planetary
Nebula**

Now the outer layers of the star start to drift off into space. The star loses most of its mass to the nebula.

**White
Dwarf**

The star cools and shrinks; it will eventually be only a few thousand miles in diameter! No nuclear reactions take place and the faint star radiates its heat into space.

**Black
Dwarf**

Eventually the star has lost all its heat to space and is now cold and dark.

The Citizen and the Chinese State Perry Keller, 2017-03-02 This volume addresses several core questions regarding the nature of law in China and its future development In particular these articles shed light on whether the rule of law ideal is commensurable with government based on the Chinese Communist Party Beginning virtually from scratch China has established a comprehensive legal system that boasts a constitution primary and secondary legislation and plentiful regulations covering most areas of public and private life Yet as these articles discuss its courts are enmeshed in Party and state hierarchies and are not empowered to directly apply constitutional principles or rights ensuring that the law is subordinate to national public policy goals Legal and extra legal methods for punishing wrongdoing and resolving disputes also raise questions of due process of law Ultimately the question is therefore whether China's legal system if eschewing formalised human rights is developing a capacity to protect fundamental human dignity
