Aeroform James Jones, Demetri Telionis, 2022-09-28 Aeroform Designing for Wind and Air Movement provides a comprehensive introduction to applying aerodynamic principles to architectural design It presents a challenge to architects and architectural engineers to give shape to the wind and express its influence on architectural form The wind pushes and pulls on our buildings infiltrates and exfiltrates through cracks and openings and lifts roofs during storm events It can also offer opportunities for resource conservation through natural ventilation or a biophilic connection between indoors and out This book provides basic concepts in fluid mechanics such as materials forces equilibrium pressure and hydrostatics introduces the reader to the concept of airflow and provides strategies for designing for wind resistance especially in preventing uplift Natural ventilation and forced airflow are explored using examples such as Thomas Herzog s Hall 26 in Hanover RWE Ag building in Essen Germany and the Kimbell Art Museum in Texas Finally issues of wind and airflow measurement are addressed A reference for students and practitioners of architecture and architectural engineering this book is richly illustrated and presents complex concepts of aerodynamic engineering in easy to understand language It prepares the architect or architectural engineer to design buildings that are visually expressive of a dialogue between wind and built form

Heating, Cooling, Lighting Norbert M. Lechner, 2014-09-23 Sustainable environmental control through building design Heating Cooling and Lighting is the industry standard text on environmental control systems with the emphasis on sustainable design By detailing the many factors that contribute to the comfort in a building this book helps architects minimize mechanical systems and energy usage over the life of the building by siting building design and landscaping to maximize natural heating cooling and lighting This new fourth edition includes new information on integrated design strategies and designing for the Tropics Resources include helpful case studies checklists diagrams and a companion website featuring additional cases an image bank and instructor materials Designing buildings that require less energy to

heat cool and light means allowing the natural energy of the sun and wind to reduce the burden on the mechanical and electrical systems Basic design decisions regarding size orientation and form have a great impact on the sustainability cost and comfort of a building Heating Cooling and Lighting provides detailed guidance for each phase of a design project Readers will Understand the concept of sustainability as applied to energy sources Review the basic principles of thermal comfort and the critical role of climate Learn the fundamentals of solar responsive design including active and passive solar systems as well as photovoltaics Discover how siting architectural design and landscaping can reduce the requirements for mechanical and electrical systems In sustainable design mechanical and electrical systems should be used to only accomplish what the architect could not by the design of the building itself With this in mind designers require a comprehensive understanding of both the properties of energy and the human factors involved in thermal comfort Heating Cooling and Lighting is the complete industry leading resource for designers interested in sustainable environmental control *The Sustainable City VII* M. Pacetti,G. Passerini,C.A. Brebbia,G. Latini,2012-05-07 Containing research on sustainable urban redevelopment presented at the latest in a biennial series organised by the Wessex Institute of Technology this book addresses an area of growing interest The conference series was first held in 2000 These proceedings are split into two volumes Urban areas produce a series of environmental challenges arising from the consumption of natural resources and the consequent generation of waste and pollution contributing to the development of social and economic imbalances All these problems which continue to grow in our society require the development of new solutions Topics include Volume I Urban Strategies Eco town Planning Planning development and management Planning development and management for urban conservation and regeneration Case studies Landscape planning and design Environmental management Intelligent environments and emerging technologies Volume II Sustainable energy and the city Waterfront developments The community and the city Quality of life Cultural heritage issues Transportation Planning for risk Planning for risk Transport models in emergency conditions Industrial wastes as raw materials Waste management Safety and security The city heritage
