Sundiver The Uplift Saga 1:

Sundiver David Brin, 1980 Mankind encounters conflicts among the inhabitants of the universe as brave individuals prepare to journey into the boiling inferno of the sun

A Companion to Science Fiction David Seed, 2008-06-09 A Companion to Science Fiction assembles essays by an international range of scholars which discuss the contexts themes and methods used by science fiction writers This Companion conveys the scale and variety of science fiction Shows how science fiction has been used as a means of debating cultural issues Essays by an international range of scholars discuss the contexts themes and methods used by science fiction writers Addresses general topics such as the history and origins of the genre its engagement with science and gender and national variations of science fiction around the English speaking world Maps out connections between science fiction television the cinema virtual reality technology and other aspects of the culture Includes a section focusing on major figures such as H G Wells Arthur C Clarke and Ursula Le Guin Offers close readings of particular novels from Mary Shelley s *Frankenstein* to Margaret Atwood s *The Handmaid s Tale*

Of Sex and Faerie: further essays on Genre Fiction John Lennard, 2010 Taking up where *Of Modern Dragons* 2007 left off these essays continue Lennard s investigation of the praxis of serial reading and the best genre fiction of recent decades including work by Bill James Walter Mosley Lois McMaster Bujold and Ursula K Le Guin There are groundbreaking studies of contemporary paranormal romance and of Hornblower s transition to space while the final essay deals with the phenomenon and explosive growth of fanfiction and with the increasingly empowered status of the reader in a digital world There is an extensive bibliography of genre and critical work with eight illustrations John Lennard is Director of Studies at Hughes Hall Cambridge and has also taught for the Universities of London Notre Dame and for the Open University and was Professor of British American Literature at the University of the West Indies Mona 2004 09 *Of Modern Dragons* and other essays on genre fiction 2007 is also available from Lulu

Our Grandchildren Redesigned Michael Bess, 2016-09-06 A panoramic overview of biotechnologies that can endlessly boost human capabilities and the drastic changes these superhuman traits could trigger Biotechnology is moving fast In the coming decades advanced pharmaceuticals bioelectronics and genetic interventions will be used not only to heal the sick but to boost human physical and mental performance to unprecedented levels People will have access to pills that make them stronger and faster informatic devices will interface seamlessly with the human brain and epigenetic modification may allow people to reshape their own physical and mental identities at will Until recently such major technological watersheds like the development of metal tools or the industrialization of manufacturing came about incrementally over centuries or longer People and social systems had time to adapt they gradually developed new values norms and habits to accommodate the transformed material conditions But contemporary society is dangerously unprepared for the dramatic changes it is about to experience down this road on which it is already advancing at an accelerating pace The results will no doubt be mixed People will live longer healthier lives will fine tune their own thought processes and will

generate staggeringly complex and subtle forms of knowledge and insight But these technologies also threaten to widen the rift between rich and poor to generate new forms of social and economic division and to force people to engage in constant cycles of upgrades and boosts merely to keep up Individuals who boost their traits beyond a certain threshold may acquire such extreme capabilities that they will no longer be recognized as unambiguously human In this important and timely book prize winning historian Michael Bess provides a clear nontechnical overview of cutting edge biotechnology and paints a vivid portrait of a near future society in which bioenhancement has become a part of everyday life He surveys the ethical questions raised by the enhancement enterprise and explores the space for human agency in dealing with the challenges that these technologies will present Headed your way over the coming decades new biotechnologies that can powerfully alter your body and mind The possibilities are tantalizing Rejuvenation therapies offering much longer lives 160 and even beyond in full vigor and mental acuity Cognitive enhancement through chemical or bioelectronic means the rough equivalent of doubling or tripling IQ scores Epigenetic tools for altering some of your genetically influenced traits at any point in your lifetime body shape athletic ability intelligence personality Bioelectronic devices for modulating your own brain processes including your pleasure centers a potentially non stop high Direct control of machines by thought and perhaps direct communication with other people brain to brain a new dimension of sharing and intimacy But some of the potential consequences are also alarming A growing rift between the biologically enhanced and those who can't afford such modifications A constant cycle of upgrades and boosts as the bar of normal rises ever higher Humans 95 Humans XP Humans 8 The fragmentation of humankind into rival bioenhancement clusters A gradually blurring boundary between person and product Extreme forms of self modification with some individuals no longer recognized as unambiguously human
