Suomalaisen Kirjallisuuden Seuran Toimituksia J ..... - F ..... Granlund,1849      **Suomalaisen Kirjallisuuden Seuran Toimituksia** Frederich Wilhelm Pipping,1857      **Suomalaisen Kirjallisuuden Seuran Toimituksia**,1867      *Suomea suomeksi* 1 ,1992      Suomalaisen Kirjallisuuden Seuran Toimituksia Johann Heinrich Daniel Zschokke,1844      **Phonology in the 1980s** Didier L. Goyvaerts,1981-01-01 This volume brings together a number of ground breaking papers in the theory of phonology      **The World of Ladoga** Jukka Korpela,2008 This book is one of the first to focus on Medieval and Early Modern state formation on the north eastern periphery of Europe Researchers have traditionally perceived an East West conflict between Sweden and Novgorod concerning the late medieval colonization of the northern forest areas but it seems that the East Fennoscandian boreal forest zone was not an unpopulated area at that time but was a landscape inhabited by heterogeneous hunting and fishing populations and possessing another kind of culture The ways of life of these populations can be observed by coordinating various bodies of palaeoecological palaeobotanic genetic meteorological folkloristic philological and archaeological material The traditional written sources did not extend to this area and its nature is only reflected in the expansion and organization of the European Christian culture and power both Russian and Swedish Also the increasing number of source documents the growing population as reflected in those written documents and the expansion of arable cultivation do not indicate any real colonization but simply a change of the existing economic system from a semi nomadic hunting and fishing economy to a field based agriculture in response to the expansion of regular taxation and state control Seen from this perspective the people who earlier were invisible gradually become visible in the sources The East Fennoscandian boreal forest zone was a European periphery during the Viking Age but was connected to the European exchange of goods through the same waterways that also brought the first Christian cultural impact The European economic crisis of the 14th Century nevertheless excluded the area from the late medieval process of state formation and it became an object of both Muscovite and Swedish interests only after the end of the 15th Century This meant the formation of parishes the organization of an early local administration with regular taxation the permanent stationing of military forces the establishment of a physical border and the assimilation of the local people into European culture accompanied by marginalization of the traditional forms of life      Suomalaisen Kirjallisuuden Seuran Toimituksia Friedrich I. (Schweden, König),1877      *On the Legacy of Lutheranism in Finland* Kaius Sinnemäki,Anneli Portman,Jouni Tilli,Robert H. Nelson,2019-12-10 This volume analyses the societal legacy of Lutheranism in Finland in broad terms It contributes to the recent renewed interest in the history of religion in Finland and the Nordic countries by bringing together researchers in history political science economics social psychology education linguistics media studies and theology to examine the mutual relationship between Lutheranism and society in Finland The two main foci are i the historical effects of the Reformation and its aftermath on societal structures and on national identity values linguistic culture education and the economy and ii the

adaptation of the church and its theology to changes in the geo political and sociocultural context Important sub themes include nationalism and religion the secularization and institutionalization of traditional values multiple Protestant ethics and long continuities in history Overall the book argues that large changes in societies cannot be explained via secular factors alone such as economic development or urbanization but that factors pertaining to religion provide substantial explanatory power for understanding societal change and the resulting societal structures

*Language*

Contacts at the Crossroads of Disciplines Lea Meriläinen,Heli Paulasto,Helka Riionheimo,2015-01-12 This volume offers a

cross disciplinary insight into language contact research bringing together fresh empirical and theoretical studies from various fields concerning different dimensions of language contact and variation second language acquisition and translation

In the present day world of globalization population mobility and information technology the themes of multilingualism and contact induced language change are as topical as ever and research on language contacts and cross linguistic influence has expanded rapidly during the last few decades Along with the increasing specialization of related disciplines their research

perspectives methods and terminology have become dispersed although language contact phenomena themselves can rarely be confined within the scope of a single discipline This collection of articles creates dialogue between researchers from

different scientific backgrounds thus viewing language contact phenomena from a broader perspective When language

contact is re defined to include the mental or cognitive level of contact between different languages and varieties in the

minds of language learners or translators salient links are created between the different disciplines dealing with this subject

Literacy Skills as Local Intangible Capital Sofia Kotilainen,2016-09-15 This book studies the grey area of the

success story of rural lending libraries in the Nordic countries through the activities of people s libraries in one area of Central Finland The study explores the influence of social cultural geographical and economic phenomena such as the spread

of revivalist movements on the reading habits of the local population and reveals interesting reasons why the establishment of elementary schools and popular libraries and the growth of functional literacy did not automatically increase the

informational capital of the common people of remote regions or lead to their social advancement This study represents a

methodological experiment in describing the life history of a people s library The combination of collective biographical and transnational comparative methods with rarely utilized original sources in this study is innovative and has not been used

before in Finnish historical research on functional literacy and popular libraries The advantage of the comparison is that it

reveals the attitudes to libraries that were characteristic of each of the cultures involved For the people of the Finnish

countryside in the late nineteenth century libraries represented a way of acquiring new information that was still strange and

unwelcome The distribution of immaterial capital was extremely uneven with regard to age gender and social rank In the

earlier Finnish research has not very often been analysed how the communal status of the peasant reader and his or her personal networks in the local community affected the quality of his or her reading habits This book shows that the location of the library in its local community and on the other hand the status and position of its customers in their networks had a great significance on the use of the library and thus to the improvement of reading skills

### **Nordic Latin Manuscript**

**Fragments** Åslaug Ommundsen,Tuomas Heikkilä,2017-07-14 Much of what is known about the past often rests upon the chance survival of objects and texts Nowhere is this better illustrated than in the fragments of medieval manuscripts re used as bookbindings in the sixteenth and seventeenth centuries Such fragments provide a tantalizing yet often problematic glimpse into the manuscript culture of the Middle Ages Exploring the opportunities and difficulties such documents provide this volume concentrates on the c 50 000 fragments of medieval Latin manuscripts stored in archives across the five Nordic countries of Denmark Finland Iceland Norway and Sweden This large collection of fragments mostly from liturgical works provides rich evidence about European Latin book culture both in general and in specific relation to the far north of Europe one of the last areas of Europe to be converted to Christianity As the essays in this volume reveal individual and groups of fragments can play a key role in increasing and advancing knowledge about the acquisition and production of medieval books and in helping to distinguish locally made books from imported ones Taking an imaginative approach to the source material the volume goes beyond a strictly medieval context to integrate early modern perspectives that help illuminate the pattern of survival and loss of Latin manuscripts through post Reformation practices concerning reuse of parchment In so doing it demonstrates how the use of what might at first appear to be unpromising source material can offer unexpected and rewarding insights into diverse areas of European history and the history of the medieval book

**Kirjallisuuden Seuran Toimituksia** R .... M .... Oppman,1867    **Private or Socialistic Forestry?** Matti Palo,Erkki Lehto,2012-02-13 While deforestation continues at an alarming rate around the world discussions on the range of underlying causes continue The premise is that studying successful transitions from deforestation to sustainable forestry ex post in Finland can provide novel insights into how deforestation in the tropics might be reduced in the future Our fundamental question here is why Finland succeeded to stop deforestation for a century ago and why not the same is feasible in the contemporary tropical countries This book presents a novel integrated theory within which this case study on Finland and contemporary modeling of underlying causes of tropical deforestation are developed Finland remains the world s second largest net exporter of forest products while maintaining the highest forest cover in Europe A transition from deforestation to sustainable industrial forestry took place in Finland during the first part of the 20th century The underlying causes of this transition are compared via our theory with deforestation in 74 contemporary tropical countries Both appear similar and support our theory The interaction of public policies and market institutions has appeared to be critical during this transition The study s findings suggest that private forest ownership with a continuous increase in the real value of forests and

alleviation of poverty under non corruptive conditions has been a necessary but not a sufficient condition for this transition In a parallel way public policies have also proved to be a necessary but not sufficient condition in this transition The conclusion is that socialistic forestry along with corruption is artificially maintaining too low values in the tropical forests The opportunity cost of sustainable forestry remains too high and deforestation by extensification of agriculture therefore continues The prevailing socialistic forestry with dominating public forest ownership is by purpose maintaining administratively set low stumpage prices leading to low value of forests wide corruption and continuous forest degradation and deforestation An effective remedy to raise the value of forests is found to be within forestry

### **Convergence and**

**Divergence in the Eastern Circum-Baltic Area** Björn Wiemer,Peter Arkadiev,Petar Kehayov,Rogier Blokland,2025-08-18

The volume summarizes research on the structural convergence and divergence of languages in the eastern part of the Circum Baltic Area by providing its profile against a genealogical and typological background Methodological issues needed to assess factors that condition convergence in contact superposition zones or that otherwise lead to differentiation among related varieties are discussed Against this backdrop synthetic surveys of major and minor Finnic languages are provided followed by corpus based case studies on morphosyntactic phenomena The volume thus presents both a synthetic compendium and a series of specific up to date studies with special attention to micro variation

### *Issues in Vowel Harmony*

Robert Michael Vago,1980-01-01 Vowel harmony is a well known phonological phenomenon found in a large number of languages spoken mainly in Eurasia and the African continent In simple terms vowel harmony is a law which governs the co occurrence of vowels within a span of utterance nearly always the word The contributions of this volume focus on various not always uncontroversial aspects of vowel harmony that include typological investigations phonetic acoustic experimental studies descriptions of individual systems genetic and historical ramifications and implications for a variety of theoretical models This volume will prove to be a useful guide to the multifaceted issues posed by an often discussed and quite significant phonological process This volume will stimulate further discussion and better understanding of the issues raised by the intricate process called vowel harmony
