Omcaur, 2014-05 We have come to a stage where we have to choose a purpose Whether to make human mind a fact gathering machine or a tool for realization Whether to overstuff the mind with data and or to use it as a breather of novelty We have reached the saturation point of information which we cannot decide how to use for humanity We have marvelous understanding of universe and our existence and whether duality or non duality best defines it We have understood a lot regarding God individual soul and regarding universality of humanity Beyond that we ever remain helpless insecure and disease ridden creatures of course violent and over competitive too Our relentless intellectual expedition is taking away one serious purpose of our existence To move from the contingent subject position and enter into the real subjective awareness of both inner and outer world is the missing purpose The ABC talks about that purpose Whether to keep pressing absurd intellectual understanding of this pointless universe or defer it for awhile and come to a bit of realization It talks about putting phased end to institutionalized construction of intellectual mind which eats away the best years of life It talks about silently entering into depths of realization that surpasses all understanding **Wonders of the Human Body** Auguste Le Pileur, 1870 **Applied anatomy; the construction of the human body considered in relation** Gwilym George Davis, 1924 **Fascia: The Tensional Network of the Human Body - E-Book** Robert Schleip, Carla Stecco, Mark Driscoll, Peter Huijing, 2021-12-08 The role of the fascia in musculoskeletal conditions and as a body wide communication system is now well established Fascia The Tensional Network of the Human Body constitutes the most comprehensive foundational textbook available that also provides the latest research theory and science around fascia and their function This book is unique in offering consensus from scientists and clinicians from across the world and brings together the work of the group behind the international Fascia Research Congress It is ideal for advanced sports physiotherapists physical therapists musculoskeletal orthopaedic medicine practitioners as well as all professionals with an interest in fascia and human movement The comprehensive contents lay the foundations of understanding about fascia covering current scientific understanding of physiology and anatomy fascial related disorders and associated therapies and recently developed research techniques Full colour illustrations clearly show fascia in context New content based on latest research evidence Critical evaluation of fascia oriented therapies by internationally trusted experts Chapter outlines key points and summary features to aid navigation Accompanying e book version include instructional videos created by clinicians **Wonders of the Human Body.
