Social Action Seumas Miller, 2001-11-26 Social action is central to social thought This centrality reflects the overwhelming causal significance of action for social life the centrality of action to any account of social phenomena and the fact that conventions and normativity are features of human activity This book provides philosophical analyses of fundamental categories of human

social action including cooperative action conventional action social norm governed action and the actions of the occupants of organizational roles A distinctive feature of the book is that it applies these theories of social action categories to some important moral issues that arise in social contexts such as the collective responsibility for environmental pollution humanitarian intervention and dealing with the rights of minority groups Avoiding both the excessively atomistic individualism of rational choice theorists and implausible collectivist assumptions this important book will be widely read by philosophers of the social sciences political scientists and sociologists *Communication in Extension* Harry A. Carey, Food and Agriculture Organization of the United Nations, 1999-01-01 Communication in extension plays an important role in technology transfer whereas many field extension workers are poorly trained in this particular area as well as in the development of educational materials This publication was prepared as a teaching and learning guide to be used in the pre service and in service education of extension staff community development workers and all those who work and serve in rural communities It can be considered as an extension methodology tool box to train extension field staff in their work at the village level

Transforming Social Action into Social Change Shana Cohen, 2017-05-25 Cohen offers a new framework for analyzing social projects and local social activism Rather than look at how single projects are designed and managed to evaluate their impact the approach calls for analyzing fields of social action policy and politics institutional behavior social networks among policymakers and practitioners and availability of funding and other resources Combined they affect the conceptualization of a social problem and the design and practice of social intervention More broadly through circumscribing the range of thinking about social problems they delimit possibilities to generate social change Analyzing fields also allows for linking macro level trends in areas like policy to decision making within individual organizations and the effectiveness of projects at instigating the desired transformation in individual and collective behavior Working together policymakers individual activists nonprofit organizations and staff in public institutions like schools and hospitals can critique and alter fields to challenge more effectively social problems This collaboration in turn affects how social policies are designed and ultimately the politics of social change

Alfred Schutz's Sociological Aspect of Literature Lester Embree, 1997-12-31 The maintext in the present volume has been constructed out of passages found scattered about in thirty five years of Alfred Schutz's writings and it has been constructed by following a page of notes for a lecture that he gave in 1955 under the title Sociological Aspect of Literature The result can be considered the substance of Schutz's contribution to the theory of literature More detail about how this construction has been performed is offered in the Editor's Introduction The complementary essays are by scholars from Germany Japan and the United States from several generations and from the disciplines of anthropology philosophy and sociology These researchers were invited to reflect in their own perspectives on the main text and in relation to matters referred to within and beyond it Draft versions of most of these complementary essays were presented for critical discussion in a research symposium held at the Graduate Faculty of Political and Social Science of

Carlton Moore, 2024-06-18 What this book argues for in today's twenty first century church was a hallmark doctrine of old school Presbyterianism of the nineteenth century the doctrine of the spirituality of the church Which eschatological approach one uses will affect one's understanding of the nature and practice of missions Mission creep the expansion of the church's original objective's is a real concern for the contemporary church and how one understands eschatology affects one's focus on missions The mission of the church is narrow Matt 28:18-20 and the calling of individual

believers is broad Rom 12 1 2 If we fail to make this crucial distinction the church's mission will lose its biblical emphasis And if the church's mission is lost then the authority structure instantiated in the offices and officers of the church devolves into illegitimacy because the church is no longer advancing the kingdom ends she was mandated to do by King Jesus If the institutional church fails to do this we will be relinquishing and abdicating and abandoning our most singular and particular and peculiar kingdom of God vocation the harvesting gathering and perfecting of the saints *Emotions through Literature* Mariano Longo, 2019-07-23 Engaging with the wide sociological literature on emotions this book explores the social representation of emotions their management and their effects by making reference to creative sources With a specific focus on literary narrative including the works of figures such as Dante Austen Manzoni Tolstoy and Kundera the author draws out the capacity of literary works to describe and represent both the external aspects of social relations and the inner motivations of the involved actors An interdisciplinary study that combines sociology narratology philosophy historical analysis and literary criticism *Emotions through Literature* invites us to re think the role of emotions in sociological analysis employing literary narratives to give plausible intellectual responses to the double nature of emotions their being both individual and social
