Social Capital And Information Technology:

Social Capital and Information Technology Marleen Huysman, Volker Wulf, 2004 A multidisciplinary examination of the interplay between social capital the value derived from social ties and information technology The concept of social capital or the value that can be derived from social ties created by goodwill mutual support shared language common beliefs and a sense of mutual obligation has been applied to a number of fields from sociology to management It is only lately however that researchers in information technology and knowledge management have begun to explore the idea of social capital in relation to their fields This collection of thirteen essays by computer scientists sociologists communication specialists economists and others presents a multidisciplinary look at this particular intersection of information technology and social science and the need to adopt a sociotechnical perspective For the most part the contributors take a positive view of the interplay of social capital knowledge sharing and community building Some essays look at specific instances including the on line and face to face relationships of a community of athletes the building of social capital among Iranian NGOs and the Internet based communities created by the open source movement while others discuss more general ideas of civic and personal communities The last four essays examine computer applications that augment social capital including topic and member centered communications spaces such as the Expert Finder and the Loops system and virtual repositories of knowledge such as the Answer Garden and Pearls of Wisdom *Digital Cities III. Information Technologies for Social Capital: Cross-cultural Perspectives* Peter van den Besselaar, Satoshi Koizumi, 2005-04-05 Digital cities constitutes a multidisciplinary field of research and development where researchers designers and developers of communityware interact and collaborate with social scientists studying the use and effects of these kinds of infrastructures and systems in their local application context The field is rather young After the diffusion of ICT in the world of organizations and companies ICT entered everyday life And this also influenced ICT research and development The 1998 Workshop on Communityware and Social Interaction in Kyoto was an early meeting in which this emerging field was discussed After that two subsequent Digital Cities workshops were organized in Kyoto and a third one in Amsterdam This book is the result of the 3rd Workshop on Digital Cities which took place September 18 19 2003 in Amsterdam in conjunction with the 1st Communities and Technologies Conference Most of the papers were presented at this workshop and were revised thoroughly afterwards Also the case studies of digital cities in Asia the US and Europe included in Part I were direct offsprings of the Digital Cities Workshops Together the papers in this volume give an interesting state of the art overview of the field In total 54 authors from the Americas from Asia and from Europe were contributed to this volume The authors come from Brazil two the USA eleven China three Japan fourteen Finland two Germany two Italy three Portugal two the Netherlands eight and the UK seven indicating the international nature of the research field *Social Capital Modeling in Virtual Communities: Bayesian Belief Network Approaches* Daniel, Ben, 2009-05-31 In this book researchers have employed different approaches to examine and

Social Capital at the Community Level John M. Halstead,Steven C. Deller,2015-04-24 In Social Capital at the Community Level John Halstead and Steven Deller examine social capital formation beyond the individual level through a variety of disciplines planning economics regional development sociology as well as non traditional approaches like engineering and built environmental features The notion of social capital in community and economic development has become a focus of intense interest for policy makers practitioners and academics The notion is that communities with higher levels of social capital networks trust and norms will prosper both economically and socially In a practical sense how do communities use the notion of social capital to build policies and strategies to move their community forward Are all forms of social capital the same and do all have a positive influence on the community To help gain insights into these fundamental questions Social Capital at the Community Level takes a holistic interdisciplinary or systems approach to thinking about the community While those who study social capital will acknowledge the need for an interdisciplinary approach most stay within their disciplinary silos One could say there is strong bonding social capital within disciplines but little bridging social capital across disciplines The contributors to Social Capital at the Community Level have made an attempt to build that bridging social capital While disciplinary biases and research approaches are evident there is significant overlap about how people with different disciplinary perspectives think about social capital and how it can be applied at the community level This can be from neighborhoods addressing a localized issue

to a global response to a natural disaster This book is an invaluable resource for scholars researchers and policy makers of community and economic development as well as rural sociologists and planners looking to understand the opaque process of social capital formation in communities Social Dimensions of Information Technology G. David Garson,2000 This anthology brings together multiple viewpoints on the social dimensions of the revolution in information technology The chapters cover social political educational personal and international dimensions of information technology impacts Each chapter focuses on different aspects of the effects of computing and the new information technologies that have accelerated every area of human life This book raises important issues with profound implications for public policy and societal development *The Social Capital of Entrepreneurial Newcomers* Robert Lee,2017-03-30 Lee takes the oft cited belief that entrepreneurial endeavour lives and dies by the quality of the networks set in play and subjects it to a rigorous and sustained analysis In this he not only provides the reader with an authoritative theoretical and empirical foray into how entrepreneurs can create and sustain different forms of social capital he does so with a strong sense of how power frames and taints its acquisition and use Lee's book is a valuable contribution to our understanding of how in entrepreneurial activity as in many walks of life it is those with already established status who set the agenda by which opportunity and its pursuit is constituted Robin Holt Professor of Entrepreneurship Politics and Society Copenhagen Business School Denmark Robert Lee drives forward the agenda of socially situated cognition research moving beyond a static model of entrepreneurial cognition and offering instead a dynamic socially embedded communication based perspective He breaks from the traditional focus on either the individual entrepreneurial agent or the social and institutional context of entrepreneurship and makes a serious and skilful effort to provide an integrative understanding of the entrepreneur as placed in a complex relational and ambiguous context Recognising that entrepreneurship is both cognitive and relational he plays with the idea of power within legitimacy creation and through this illustrates the ultimately distributed nature of entrepreneurial processes This book adds to the growing domain of socially situated entrepreneurial cognition research and will appeal to those interested in understanding the connection between cognition communication and legitimacy in the context of entrepreneurship Jean Clarke Professor of Entrepreneurship and Organization Leeds University Business School University of Leeds UK In a very welcome contribution to the literature Robert Lee explores the social capital mobilised by entrepreneurs and develops a communicative action approach that yields important insights into how would be entrepreneurs achieve legitimacy through navigating the complex web of power and status relations in which they are enmeshed This book will appeal not only to those interested in entrepreneurship but also be a valuable reference source for those interested in the workings of social capital Michael Bresnen Professor of Organisation Studies Alliance Manchester Business School University of Manchester UK This book presents a novel and intellectually stimulating account of the understudied links between entrepreneurial newcomers bridging ties and their networked cognition With a paucity of research addressing cognitively specific features of networked

language and conduct The Social Capital of Entrepreneurial Newcomers explores how entrepreneurial newcomers attune their cognition when interacting with high status and powerful vertical bridges Largely reflecting communication accommodation perspectives the author theoretically and empirically examines entrepreneurial newcomers cognitive convergence and divergence when bridging *Entrepreneurship, Social Capital and Governance* Charlie Karlsson, Börje Johansson, Roger Stough, 2012-01-01 This book highlights the role of entrepreneurship social capital and governance for regional economic development In recent decades many researchers have claimed that entrepreneurship is the most critical factor in sustaining regional economic growth However most entrepreneurship research is undertaken without considering the fundamental importance of the regional context Other research has emphasized the role of social capital but there are substantial problems in empirically relating measures of social capital to regional economic development The expert contributors to this work highlight the role of governance in regional growth an area that has so far been relatively under researched underpinning their findings with new theoretical and empirical evidence They conclude that the relationship between entrepreneurship social capital and governance in factors affecting regional economic development are complex and interdependent and that to influence these factors and the relationship between them policymakers must have a long term perspective and be both patient and persistent in their efforts This enlightening book will be of great interest to academics students and researchers across a range of fields including regional science regional economics economic geography regional planning public policy entrepreneurship political science and economic sociology Policymakers involved in regional policymaking from national down to regional and local levels will also find the book to be an illuminating read Nurturing Social Capital in Excluded Communities Julia Preece, 2018-02-06 This title was first published in 2000 Emanating from a two year action research project aimed at devising higher education courses for excluded social groups this book examines ways in which UK higher education can be accessed and valued by adults who have previously been excluded It also explores the topical argument that education contributes to building social as well as human capital a necessary feature of citizenship and sustainable communities IGC 2018 Paolo Manunta, Nining Indroyono Soesil, Hesti Meilina, Yunardi, 2018 The conference is hosted by Program Pascasarjana Universitas Syiah Kuala recognizably abbreviated as PPs UNSYIAH the largest and the oldest national university in Aceh The IGC will provide an excellent opportunity for academics teachers students educators researchers and education stakeholders to share knowledge and research findings as well as to present ideas raising awareness of the Sustainable Development Goals to promote research and action in Innovation Creativity Digital and technopreneurship for Sustainable Development and technological Contexts **Social Computing: Concepts, Methodologies, Tools, and Applications** Dasgupta, Subhasish, 2009-11-30 Uncovers the growing and expanding phenomenon of human behavior social constructs and communication in online environments **Current Research on Information Technologies and Society** Jennifer Earl, Katrina Kimport, 2016-03-17 Research on communication and

information technologies is of growing importance to sociology and the interdisciplinary examination of communication and new media This volume includes eight chapters examining recent developments in the field illustrating the maturation vibrancy and diversity of this field of study as well as pointing to rich new avenues for scholarly exploration Contributions aptly chart three key developments that characterize current research on communication and digital media First chapters demonstrate the maturation of work on measurement demonstrating the importance of refining measurements of online activities and their consequences For instance contributions evaluate social network measures frequently used in online research alternative measures for online activity and alternative measures of Twitter activity Second the volume showcases continued work on understanding user behaviour including research on the consequence of reward systems similar to badges and on the limitations of purely technological solutions to social dilemmas in emergency preparedness Finally chapters identify emerging questions for the field related to social media such as research on potential privacy and identity implications of social media different dispositions toward social media use and variation in levels of social media usage This book was originally published as a special issue of Information Communication Society

Youth Sport and Social Capital

Sean F. Brown, 2020-06-04 This book examines the youth sport parent experience through the lens of social capital a cornerstone social science concept of the past 30 years Social capital reflects the value of one's social networks and the actual and potential benefits and costs of relationships Bringing together a team of kids for a season also brings together their families who all must negotiate this new social world Within this world relationships are bound to form and these are the foundation upon which this project rests Youth sport scholars have traditionally been interested in questions such as how many kids play sports what sports they play how and why do they start playing and stop playing and the costs and benefit of participation However aside from sensational examples of youth sport parents behaving badly scholars know far less about the parental experience This time is meaningful for parents because parents often spend as much or even more time at the fields than their children It is thus worth examining what they might get out of this investment Utilizing two years of fieldwork and over 30 interviews with parents and board members of a youth baseball league in the southwestern United States this book provides an inside look at the beneficial relationships that can be found in the bleachers of a kids baseball game as well as the unseen high stakes games waged in the boardroom where relationships can carry heavy costs as well This book was originally published as a special issue of Sport in Society

Theories of Social Capital

Ben Fine, 2010-01-11 Tracing the evolution of social capital since his highly acclaimed contribution of 2001 Social Capital Versus Social Theory Ben Fine consolidates his position as the world's leading critic of the concept Fine forcibly demonstrates how social capital has expanded across the social sciences only by degrading

the different disciplines and topics that it touches a McDonaldisation of social theory The rise and fall of social capital at the World Bank is critically explained as is social capital s growing presence in disciplines such as management studies and its relative absence in others such as social history Writing with a sharp critical edge Fine not only deconstructs the roller coaster presence of social capital across the social sciences but also draws out lessons on how and how not to do research
