Social And Political Structures In West Germany Ursula Hoffmann-lange, Peter Jelavich, Robert Rickards, Lewis J Edinger, 2019-05-28 This book offers a view of West German social structure and political culture from a multidisciplinary perspective Focusing on the remarkable changes that have taken place in West Germany since World War II it provides a basis for judging what direction a united Germany is likely to take

Barnstorming the Prairies Jason Weems, 2015-12-29 To Midwesterners tucked into small towns or farms early in the twentieth century the landscape of the American heartland reached the horizon and then imagination had to provide what lay beyond But when aviation took off and scenes of the Midwest were no longer earthbound the Midwestern landscape was transformed and with it Jason Weems suggests in this book the very idea of the Midwest itself Barnstorming the Prairies offers a panoramic vista of the transformative nature and power of the aerial vision that remade the Midwest in the wake of the airplane This new perspective from above enabled Americans to conceptualize the region as something other than isolated and unchanging and to see it instead as a dynamic space where people worked to harmonize the core traditions of America's agrarian character with the more abstract forms of twentieth century modernity In the maps and aerial survey photography of the Midwest as well as the painting cinema animation and suburban landscapes that arose through flight Weems also finds a different and provocative view of modernity in the making In representations of the Midwest from Grant Wood's iconic images to the Prairie style of Frank Lloyd Wright to the design of greenbelt suburbs Weems reveals aerial vision's fundamental contribution to regional identity to Midwesternness as we understand it Reading comparatively across these images Weems explores how the cognitive and perceptual practices of aerial vision helped to resymbolize the Midwestern landscape amid the technological change and social uncertainty of the early twentieth century

Cities and Nature in the American West Char Miller, 2010-09-28 In less than a century the American West has transformed from a predominantly rural region to one where most people live in metropolitan centers *Cities and Nature in the American West* offers provocative analyses of this transformation Each essay explores the intersection of environmental urban and western history providing a deeper understanding of the complex processes by which the urban West has shaped and been shaped by its sustaining environment The book also considers how the West's urban development has altered the human experience and perception of nature from the administration and marketing of national parks to the consumer roots of popular environmentalism the politics of land and water use and the challenges of environmental inequities A number of essays address the cultural role of wilderness nature and such activities as camping Others examine the increasingly pervasive power of the West's urban areas and urbanites to redefine the very foundations and future of the American West

How the West Came to Rule Alexander Anievas, Kerem Nişancıolu, 2015-06-20 Winner of International Studies Association ISA's International Political Sociology Best Book Prize for 2017 Winner of British International Studies Association BISA's International Political Economy Working Group Book Prize of

2016 Shortlisted for the ISA Book Prize Mainstream historical accounts of the development of capitalism describe a process which is fundamentally European a system that was born in the mills and factories of England or under the guillotines of the French Revolution In this groundbreaking book a very different story is told How the West Came to Rule offers a interdisciplinary and international historical account of the origins of capitalism It argues that contrary to the dominant wisdom capitalism s origins should not be understood as a development confined to the geographically and culturally sealed borders of Europe but the outcome of a wider array of global processes in which non European societies played a decisive role Through an outline of the uneven histories of Mongolian expansion New World discoveries Ottoman Habsburg rivalry the development of the Asian colonies and bourgeois revolutions Alexander Anievas and Kerem Nisancioglu provide an account of how these diverse events and processes came together to produce capitalism *Politics, Property and Production in the West African Sahel* Tor Arve Benjaminsen, Christian Lund, 2001 Through a number of case studies from the West African Sahel this book links and explores natural resources management from the perspectives of politics property and production Resources in Education , 1999 An Introduction to Contemporary Civilization in the West Columbia University, 1928 *Absentee Landowning and Exploitation in West Virginia, 1760-1920* Barbara Rasmussen, 2014-07-11 Absentee landowning has long been tied to economic distress in Appalachia In this important revisionist study Barbara Rasmussen examines the nature of landownership in five counties of West Virginia and its effects upon the counties economic and social development Rasmussen untangles a web of outside domination of the region that commenced before the American Revolution creating a legacy of hardship that continues to plague Appalachia today The owners and exploiters of the region have included Lord Fairfax George Washington and most recently the U S Forest Service The overarching concern of these absentee landowners has been to control the land the politics the government and the resources of the fabulously rich Appalachian Mountains Their early and relentless domination of politics assured a land tax system that still favors absentee landholders and simultaneously impoverishes the state Class differences a capitalistic outlook and an ethic of growth and development pervaded western Virginia from earliest settlement Residents however were quickly outspent by wealthier more powerful outsiders Insecurity in landownership Rasmussen demonstrates is the most significant difference between early mountain farmers and early American farmers everywhere **Promised Lands** David M. Wrobel, 2002 Whether seen as a land of opportunity or as paradise lost the American West took shape in the nation s imagination with the help of those who wrote about it but two groups who did much to shape that perception are often overlooked today Promoters trying to lure settlers and investors to the West insisted that the frontier had already been tamed that the only frontiers remaining were those of opportunity Through posters pamphlets newspaper articles and other printed pieces these boosters literally imagined places into existence by depicting backwater areas as settled culturally developed regions where newcomers would find none of the hardships associated with frontier life Quick on their heels some of the West s original settlers had begun

publishing their reminiscences in books and periodicals and banding together in pioneer societies to sustain their conception of frontier heritage Their selective memory focused on the savage wilderness they had tamed exaggerating the past every bit as much as promoters exaggerated the present Although they are generally seen today as unscrupulous charlatans and tellers of tall tales David Wrobel reveals that these promoters and reminiscers were more significant than their detractors have suggested By exploring the vast literature produced by these individuals from the end of the Civil War through the 1920s he clarifies the pivotal impact of their works on our vision of both the historic and mythic West In examining their role in forging both sense of place within the West and the nation s sense of the West as a place Wrobel shows that these works were vital to the process of identity formation among westerners themselves and to the construction of a West in the national imagination Wrobel also sheds light on the often elitist sometimes racist legacies of both groups through their characterizations of Native Americans African Americans Mexican Americans and Asian Americans In the era Wrobel examines promoters painted the future of each western place as if it were already present while the old timers preserved the past as if it were still present But as he also demonstrates that West has not really changed much promoters still tout its promise while old timers still try to preserve their selective memories Even relatively recent western residents still tap into the region s mythic pioneer heritage as they form their attachments to place Promised Lands shows us that the West may well move into the twenty first century but our images of it are forever rooted in the nineteenth

Industry and Politics in West Germany Peter J. Katzenstein, 2018-08-06 Dynamic technological developments in industrial production the rise of new social movements in national politics and great changes in the international political economy have left a deep imprint on the Federal Republic A compelling explanation of West Germany s success in maintaining economic prosperity and political stability under such challenging conditions has continued to elude observers Under the editorship of Peter J Katzenstein thirteen distinguished scholars from both sides of the Atlantic here provide an original interpretation of the political economy of the Bonn Republic during the forty years since its founding and explore in particular its extraordinary capacity for accommodating change Whereas studies in political economy have typically focused on one level of political action either the shop floor or national politics or the international system this innovative account analyzes the interaction of change at all three levels bringing together case studies drawn from six manufacturing and service sectors

Utilization, Misuse, and Development of Human Resources in the Early West Indian Colonies M.K. Bacchus, 2006-01-01 This comprehensive study of the development of education in the West Indies between 1492 and 1854 examines the shifts which occurred within the nature of the education programs provided for the masses Believing existing theories of educational change are too limiting Bacchus has blended detailed analysis of such important factors as the changing role of the state the conflicting educational objectives among the dominant groups and their differences with the missionary societies providing popular education to better understand how these changes came about He attributes greater importance to the role of the

masses who increasingly asserted their views about the type of education they wanted for their children The book demonstrates how instructional programs developed in the West Indies not as the result of a rational curriculum development process but rather through a series of compromises made to accommodate the views of various influential groups Education and curriculum evolved by way of a show yet constant changing dialectical process Such an insightful work will arouse the interest of scholars and students of educational development particularly those studying the West Indies

century CE when it was fiercest through the early Middle Ages as atavistic forms of magic mutated and found sanctuary in the daily habits of the converted peoples and new paganisms entered Europe with their own forms of magic By the year 1000 she concludes many forms of magic had been tamed and were by the reckoning of the elite essentially ineffective as were the women who practiced it and the rituals that attended it Politics and Society in the Developing World Mehran
