Child Public Health Dr Mitch Blair, Professor Sarah Stewart-Brown, Dr Tony Waterston, Dr Rachel Crowther, 2010-01-21. Despite children making up around a quarter of the population the first edition of this book was the first to focus on a public health approach to the health and sickness of children and young people. It combined clinical and academic perspectives to explore the current state of health of our children, the historical roots of the speciality and the relationship between early infant and child health on later adult health. Child public health is a rapidly developing field and is increasingly recognised throughout the world as a major area of focus for population health. Targeting the health of children now is essential if we are to achieve a healthy population as adults. For the second edition the text has been revised and updated with new material on health for all, children, global warming, child participation, systems theory, refugees, commissioning and sustainable development. Child Public Health 2e will be of interest to public health practitioners, paediatricians, general practitioners with a child health and commissioning interest and GP trainees. Whilst paediatricians are given a unique population perspective on their clinical specialty, public health professionals will gain a specialist insight into a specific population group and primary care doctors, nurses and managers will find support for their commissioning and clinical governance agendas.

fourth trimester is a transitional phase in which each of you is processing the birth experience you shared and acclimatising to a new way of being. It can be hard to interpret your new baby's behaviour: is she arching her back because she has tummy ache or does she simply enjoy a stretch? Does sucking his hands indicate hunger or something else? As you navigate these early days, your emotions might be all over the place and it can be hard to find and trust your instinctive need to connect with your baby. In *Understanding Babies*, experienced movement specialist Ania Witkowska looks at what your baby needs to thrive and how they show you they need it, revealing how you can tune in to your baby so that both of you can relax and enjoy your new life together. By explaining how your baby's development is supported through movement and interaction and guiding you through simple exercises and activities, she helps demystify the early days of parenting so that you can feel more joy and less anxiety as you and your baby flourish.
