The Consciousness of the Atom (Classic Reprint) Alice A. Bailey, 2017-10-13 Excerpt from *The Consciousness of the Atom* There has probably never been a period in the history of thought entirely resembling the present Thinkers everywhere are conscious of two things first that the region of mystery has never before been so clearly defined and secondly that that region can be entered more easily than has hitherto been the case it may therefore perhaps be induced to render up some of its secrets if investigators of all schools pursue their search with determination The problems with which we are faced as we study the known facts of life and existence are susceptible of clearer definition than heretofore and though we do not know

the answer to our questions though we have not as yet discovered the solution to our problems though no panacea lies ready to our hand whereby we can remedy the world's ills yet the very fact that we can define them that we can point in the direction in which mystery lies and that the light of science of religion and of philosophy has been shed upon vast tracts which were earlier considered lands of darkness is a guarantee of success in the future We know so much more than was the case five hundred years ago except in a few circles of wise men and mystics we have discovered so many laws of nature even though as yet we cannot apply them and the knowledge of things as they are and I choose these words very deliberately has made immense strides Nevertheless the mystery land still remains to be opened up and our problems are still numerous There is the problem of our own particular life whatever that may be there is the problem of that which is largely termed the not self and which concerns our physical body our environment our circumstances and our life conditions if we are of an introspective turn of mind there is the problem of our particular set of emotions and of the thoughts desires and instincts by which we control action Group problems are many why should there be suffering starvation and pain Why should the world as a whole be in the thrall of the direst poverty of sickness of discomfort What is the purpose underlying all that we see around us and what will be the outcome of world affairs viewing them as a whole What is the destiny of the human race what is its origin and what is the key to its present condition Is there more than this one life and is the sole interest to be found in that which is apparent and material Such queries pass through all our minds at various times and have passed through the minds of thinkers right down through the centuries About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
