The Continental Shelf Resources Boundaries And Management:

Cases and Materials on the Law of the Sea Louis B. Sohn, John Noyes, 2021-10-25 *Cases and Materials on the Law of the Sea* is a thoroughly up to date text that will be used both as a classroom course book and as a treatise and reference guide. The text contains engaging teaching materials that systematically introduce law of the sea topics placing them in the context of important themes about the roles of international law and international legal process. Historical materials of continuing importance appear alongside new materials that address such topics as maritime terrorism and port security, the protection of underwater cultural heritage, marine sanctuaries, deep sea vent resources and the operation of the International Tribunal for the Law of the Sea and other new international organizations. Published under the Transnational Publishers imprint. **A handbook on the new law of the sea. 2 (1991)** René Jean Dupuy, Daniel Vignes, 1991-10-16 The fact that the Montego Bay Convention has been only ratified by 37 States at present and that it will be some time before the 60 ratifications required by Article 308 are achieved has not prevented states from acting in accordance with the rules drawn up by the Conference. Close on one hundred states have established either exclusive economic zones broadly modelled on Part V or 200 nautical mile fishery zones and drawn on the principles laid down for exploiting living resources. Although these laws have been formulated unilaterally by states, international custom since the judgement by the International Court of Justice in the Fisheries Case of 18 December 1951 is derived from concordant national rules. This shift began even before the Conference ended and has been consolidated since then. Moreover the regime governing the sea bed beyond the limits of national jurisdiction defined by Part XI which was the stumbling block of the Conference is subject to transitional arrangements on the basis of two resolutions adopted in the Conference's Final Act, one providing for the establishment of a Preparatory Commission and the other on the preliminary activities of pioneer investors. This two volume work, an earlier edition of which appeared in French, has been written by a team of experts of international renown. It presents an analysis of the Convention with an additional Chapter on the legal regime governing underwater archaeological and historical objects. **Towards the**

Predictability and Flexibility in the Law of Maritime Delimitation Yoshifumi Tanaka, 2019-11-14 This fully revised new edition offers a comprehensive picture of the law of maritime delimitation incorporating all new cases and State practice in this field As with all types of law the law of maritime delimitation should possess a degree of predictability On the other hand as maritime delimitation cases differ flexible considerations of geographical and non geographical factors are also required in order to achieve equitable results How then is it possible to ensure predictability while taking into account a number of diverse factors in order to achieve an equitable result This is the question at the heart of the law of maritime delimitation This book explores a well balanced legal framework that reconciles predictability and flexibility in the law of maritime delimitation by looking at three aspects of the question first it reviews the evolution of the law of maritime delimitation second it undertakes a comparative study of the case law and State practice and third it critically assesses the law of maritime delimitation in its current form
