Become Conscious of Wholeness Edwin E. Olson, 2021-11-30 How can we transcend our tribal philosophical and religious differences? Is it possible to develop a global consciousness to resolve the peril to our biosphere and other human-made existential crises? Become Conscious of Wholeness: Humanity's Only Future explores how connecting human consciousness with Universal Consciousness will give individuals and societies a sense of being complete, not fragmented. Accessing Universal Consciousness: the fundamental wisdom, intelligence, and love in the Universe will align their identity and purpose and free them from limiting beliefs and fears. Universal Consciousness is the organizing, unifying force beyond space and time, filled with the creative potential from which our diverse philosophies, religions, and primordial traditions emerged. When Consciousness is understood from multiple scientific, spiritual, psychological, and mystical perspectives, what is of ultimate value becomes clear: our relationships with each other and the Earth, our essential Wholeness. The reader will explore various portals to Universal Consciousness, drawing upon their own mystical and spiritual experience to develop a more holistic Self. Specific action steps are also presented to reframe religion, reimagine education and mental wellbeing, and reform the business organizations, government agencies, and divisive politics that perpetuate a fragmented view of reality.

The fabric(ation) of consciousness Pieter F. Craffert, 2024-05-28 Consciousness is central to the quest for being human and for what the world is made of. While there is widespread agreement on the significance of consciousness for clarifying the human condition, there is no agreement on the phenomenon in search of theorising. Although there is no shortage of theories and concepts of consciousness in current consciousness research, the

dominant critical analysis of consciousness research in this study although based on existing analyses is as far as I can see new and unique in arguing for a crisis in consciousness research This book touches on most aspects of consciousness research the hard problem of consciousness neural correlates of consciousness brain models and consciousness consciousness and dualistic thinking etc but is a critical analysis of consciousness research It is not an insider but a third person perspective on current consciousness research In this regard it differs from most introductions and overviews where these topics are presented from a first person perspective the insiders claim about their research Representing the broad spectrum of consciousness research in terms of the theoretical framework of a neuro ecological perspective is a new and innovative move
