The Concise Corsini Encyclopedia of Psychology and Behavioral Science W. Edward Craighead, Charles B. Nemeroff, 2004-04-12 Edited by high caliber experts and contributed to by quality researchers and practitioners in psychology and related fields Includes over 500 topical entries Each entry features suggested readings and extensive cross referencing Accessible to students and general readers Edited by two outstanding scholars and clinicians **On-line English 3' 2005 Ed.** , *Culture and the Senses* Prof. Kathryn Geurts, 2003-01-09 Adding her stimulating and finely framed ethnography to recent work in the anthropology of the senses Kathryn Geurts investigates the cultural meaning system and resulting sensorium of Anlo Ewe speaking people in southeastern Ghana Geurts discovered that the five senses model has little relevance in Anlo culture where balance is a sense and balancing in a physical and psychological sense as well as in literal and metaphorical ways is an essential component of what it means to be human Much of perception falls into an Anlo category of seselelame literally feel feel at flesh inside in which what might be considered sensory input including the Western sixth sense notion of intuition comes from bodily feeling and the interior milieu The kind of mind body dichotomy that pervades Western European Anglo American cultural traditions and philosophical thought is absent Geurts relates how Anlo society privileges and elaborates what we would call kinesthesia which most Americans would not even identify as a sense After this nuanced exploration of an Anlo Ewe theory of inner states and their way of delineating external experience readers will never again take for granted the naturalness of sight touch taste hearing and smell Human Haptic Perception Martin Grunwald, 2008-12-10 Haptic perception human beings active sense of touch is the most complex of human sensory systems and has taken on growing importance within varied scientific disciplines as well as in practical industrial fields This book s international team of authors presents the most comprehensive collection of writings on the subject published to date and cover the results of research as well as practical applications After an introduction to the theory and history of the field subsequent chapters are dedicated to the neuro physiological basics as well as the psychological and clinical neuro psychological aspects of haptic perception **Psychology** Don H. Hockenbury, Sandra E. Hockenbury, 2002-07-19 New edition of the Hockenburys text which draws on their extensive teaching and writing experiences to speak directly to students who are new to psychology *Experience and Possibility* Joseph Mendola, 2021-01-11 Experience and Possibility concerns the modal ontology of experience It investigates the detailed metaphysics of the colors shapes and other concrete properties present in our experience of ordinary concrete objects and also of their spatial and temporal relations It examines their experienced particularity and the nature of their locations and material bits This detailed concern with specific cases reveals many inadequacies of traditional ontology But the central

novelty of the book is an intense focus on the modal aspects of such experienced entities and what it reveals about modality in general. The reality of such things would involve in surprising ways not merely what would hence be actual but also what would be merely possible. This supports a general conception of modality of the possible and the necessary according to which the actual and the possible are locally entwined and involve different types of being. The particulars, properties and relations we experience involve distinctive forms of modal structure characteristic of specific sorts of universals and irreducible particularities. When this experience is not veridical when for instance the color we experience is somewhat misleading about reality it is a puzzle how we have such experience nonetheless. Exploration of these forms of modal structure is groundwork for a new account of how our neurophysiology explains such misleading experience how our physical structure delivers such qualia. This is sketched for the case of experienced color. Its core idea is that the apparent modal structure of things we experience is sometimes due to the actual modal structure of the neurophysiology that constitutes that experience.

Ebook: Essentials of Understanding Psychology Feldman, 2016-09-16 Ebook Essentials of Understanding Psychology

Physical Change and Aging Sue V. Saxon, Mary Jean Etten, Elizabeth A. Perkins, 2009-11-09 This book has been honed into an elegant compendium. This outstanding work should be widely read; it is perhaps the best example of an integrative approach to gerontology. Score 94 4 stars Doody's. This book serves as an authoritative textbook and guide to the physical changes and common pathologies associated with the aging process with special emphasis on the psychological and social implications of these changes in the lives of older adults. This fifth edition presents the newly available research findings that differentiate normal aging from actual pathology. The authors provide a thoroughly updated and expanded review of important topics in aging including death and grieving, complementary and alternative therapies, nutrition, exercise and much more. The book also demonstrates how the elderly population can gain greater personal control over aging through lifestyle modifications and preventive health strategies. Key topics introduced and discussed: Psychosocial theories of aging; Changes and disorders in the skeletal, nervous, cardiovascular and respiratory systems; Dementia, delirium and mild cognitive impairment; Aging in persons with lifelong disabilities. This volume serves as a comprehensive textbook for students studying to become health care professionals and is also a fundamental resource for gerontologists, nurses, social workers, psychologists, rehabilitation specialists, clergy and counselors.

Building for People Arthur I. Rubin, Jacqueline Elder, United States. National Bureau of Standards, 1980

Sensory Functions of the Skin of Humans Dan R. Kenshalo, 2012-12-06 This volume represents the Proceedings of the Second International Symposium on Skin Senses held on the campus of Florida State University Tallahassee, Florida. The symposium was held on June 5 through 7, 1978, in honor of Professor Yngve Zotterman to commemorate his 80th birthday and his more than 50 years of energetic involvement in physiological and psychophysical problems of cutaneous gustatory and olfactory sensitivities. The First International Symposium on Skin Senses was intended to stimulate dialogues between electrophysiologists and psychophysicists in order to examine the

mechanisms of cutaneous sensitivity by way of a multi disciplinary approach The 12 years since that meeting has seen much progress in the morphology electrophysiology and taxonomy of cutaneous receptors There has been a growing awareness among psychophysicists that not only are psychometric threshold functions of importance but descriptions of the growth of sensations to suprathreshold stimuli are of at least equal importance One of the most exciting recent events has been the development of a technique that permits recording activity in single primary afferent nerve fibers by poking a microelectrode through the skin into a nerve bundle microneurography This development allows one to conduct psychophysical measurements of sensation and at the same time to sample the primary neural activity associated with the same stimuli The aim of this symposium was to bring together psychophysicists and microneurographers in order to explore the power and the limitations of such an approach when applied to the cutaneous senses
