literature was fantasy set in a mythical past when magic existed animals talked and the gods took an active hand in earthly affairs As the mythical past was displaced in Western estimation by the historical past and novelists became increasingly preoccupied with the present fantasy was temporarily marginalized until the late 20th century when it enjoyed a spectacular resurgence in every stratum of the literary marketplace Stableford provides an invaluable guide to this sequence of events and to the current state of the field The chronology tracks the evolution of fantasy from the origins of literature to the 21st century The introduction explains the nature of the impulses creating and shaping fantasy literature the problems of its definition and the reasons for its changing historical fortunes The dictionary includes cross referenced entries on more than 700 authors ranging across the entire historical spectrum while more than 200 other entries describe the fantasy subgenres key images in fantasy literature technical terms used in fantasy criticism and the intimately convoluted relationship between literary fantasies scholarly fantasies and lifestyle fantasies The book concludes with an extensive bibliography that ranges from general textbooks and specialized accounts of the history and scholarship of fantasy literature through bibliographies and accounts of the fantasy literature of different nations to individual author studies and useful websites

Blackstone, 2012-06 *The New Music Review and Church Music Review*, 1924 Next War John F. Antal, 2023-09-28 a useful addition to the literature of the changing character of war Its scoping and focus and its application of the identified disruptors to current challenges offer immediate insights for today's commanders and defence policymakers The Wavell Room The nature of war is constant change We live in an era of exponential technological acceleration which is transforming

how wars are waged Today the battlespace is transparent multi domain sensors can see anything and long range precision fire can target everything that is observed Autonomous weapons can be unleashed into the battlespace and attack any target from above hitting the weakest point of tanks and armored vehicles The velocity of war is hyper fast Battle shock is the operational informational and organizational paralysis induced by the rapid convergence of key disrupters in the battlespace It occurs when the tempo of operations is so fast and the means so overwhelming that the enemy cannot think decide or act in time Hit with too many attacks in multiple domains all occurring simultaneously the enemy is paralyzed In short the keys to decisive victory in war is to generate battle shock Imagine a peer fight against Communist China a new war in Europe against a resurgent Russia or a conflict against Iran in the Middle East How can our forces survive an enemy first strike in these circumstances Can we adapt to the ever accelerating tempo of war Will our forces be able to mask from enemy sensors How will leaders execute command and control in a degraded communications environment Will our command posts survive Will our commanders see and understand what is happening in order to plan decide and act in real time This book addresses these tough questions and more
