Turner, 2011-03-10 *Writing the Heavenly Frontier* celebrates the early voices of the air as it examines the sky as a metaphorical and political landscape While flight histories usually focus on the physical dangers of early aviation this book introduces the figurative liabilities of ascension Early pilot writers not only grappled with an unwieldy machine they also grappled with poetics that were extremely selective Tropes that cast Charles Lindbergh as the transcendent hero of the new millennium were the same ones that kept women black Americans and indigenous peoples imaginatively tethered to the ground The most popular flight autobiographies in the United States posited a hero who rose from the mundane to the miraculous and yet the most startling autobiographies point out the social factors that limited or forbade vertical movement both literally and figuratively A survey of pilot writing the book will appeal to flight enthusiasts and people interested in American autobiography and culture But it will also appeal strongly to readers interested in the poetics and politics of place

Antarctica David Day, 2013-05-03 Since the first sailing ships spied the Antarctic coastline in 1820 the frozen continent has captured the world's imagination David Day's brilliant biography of Antarctica describes in fascinating detail every aspect of this vast land's history two centuries of exploration scientific investigation and contentious geopolitics Drawing from archives from around the world Day provides a sweeping large scale history of Antarctica Focusing on the dynamic

personalities drawn to this unconquered land the book offers an engaging collective biography of explorers and scientists battling the elements in the most hostile place on earth We see intrepid sea captains picking their way past icebergs and pushing to the edge of the shifting pack ice sanguinary sealers and whalers drawn south to exploit the Penguin El Dorado famed nineteenth century explorers like Scott and Amundson in their highly publicized race to the South Pole and aviators like Clarence Ellsworth and Richard Byrd flying over great stretches of undiscovered land Yet Antarctica is also the story of nations seeking to incorporate the Antarctic into their national narratives and to claim its frozen wastes as their own As Day shows in a place as remote as Antarctica claiming land was not just about seeing a place for the first time or raising a flag over it it was about mapping and naming and more generally knowing its geographic and natural features And ultimately after a little known decision by FDR to colonize Antarctica claiming territory meant establishing full time bases on the White Continent The end of the Second World War would see one last scramble for polar territory but the onset of the International Geophysical Year in 1957 would launch a cooperative effort to establish scientific bases across the continent And with the Antarctic Treaty science was in the ascendant and cooperation rather than competition was the new watchword on the ice Tracing history from the first sighting of land up to the present day Antarctica is a fascinating exploration of this deeply alluring land and man's struggle to claim it

Northscapes Dolly Jørgensen, Sverker Sörlin, 2013-11-08 This book argues that the unique environments of the North have been borne of the relationship between humans and nature Approaching the topic through the lens of environmental history the contributors examine a broad range of geographies including those of Iceland and other islands in the Northern Atlantic Sweden Finland Russia the Pacific Northwest and Canada over a time span ranging from CE 800 to 2000 Northscapes is bound together by the intellectual project of investigating the North both as an imagined and mythologized space and as an environment shaped by human technology The North offers a valuable analytical framework that surpasses nation states and transgresses political and historical borders This volume develops rich explorations of the entanglements of environmental and technological history in the northern regions of the globe

Atlantic Fever Joe Jackson, 2012-05-08 For five weeks from April 14 to May 21 1927 the world held its breath while fourteen aviators took to the air to capture the 25 000 prize that Raymond Orteig offered to the first man to cross the Atlantic Ocean without stopping Joe Jackson's *Atlantic Fever* is about this race a milestone in American history whose story has never been fully told Delving into the lives of the big name competitors the polar explorer Richard Byrd the French war hero Ren Fonck the millionaire Charles Levine and the race's eventual winner the enigmatic Charles Lindbergh as well as those whose names have been forgotten by history such as Bernt Balchen Stanton Wooster and Clarence Chamberlin Jackson brings a completely fresh and original perspective to the race to conquer the Atlantic *Atlantic Fever* opens for us one of those magical windows onto a moment when the nexus of technology innovation character and spirit led so many contenders from different parts of the world to be on the cusp of the exact same achievement at the exact same time
