Unpicking Gender Jutta

Schwarzkopf, 2018-01-18 The Lancashire cotton industry doubtless counts among the most thoroughly researched industries in Britain Cotton processing has attracted attention both as the pioneer of industrialization and the harbinger of industrial decline in many ways typifying the development of the British economy from unchallenged global leader to the demise of large sectors of its manufacturing industry Yet among the spate of book and articles published about the industry there is a conspicuous lacuna Gender though rarely addressed specifically permeates the industry s historiography nonetheless This study tackles head on the notion of gender within the cotton industry during the period 1880 1914 not so much to trace its effects on the industry itself but instead concentrating on the ways gender radicalized particularly the female workers in the Lancashire mills In so doing it promotes the view that it was women weavers experience of the way in which gender inequality in the labour process clashed with varying degrees of inequality in the other spheres of their lives that caused many of them to organize for the franchise Their experience of equality in the labour process both sensitized them to inequality elsewhere and empowered them to fight against it by showing it to be a product of society rather than nature Drawing on the examples provided by disenfranchised working class men and middle class women alike they accounted for inequality in terms of their exclusion from the polity In the process of holding their own against male co workers supervisory staff employers labour activists politicians and even many middle class women they evolved their own version of working class femininity which differed in important ways from the female domesticity that had a vibrant existence in labour rhetoric

 reliant as ever on learning and scholarship The history covers dictionaries of English and its national varieties including
 American English with numerous references to developments in Europe and elsewhere which have influenced the course of
 English lexicography from publisher description **Profanity, Obscenity and the Media** Melvin J. Lasky, 2017-12-02 This
 is the second volume of Melvin J Lasky s The Language of Journalism series praised as a brilliant and original study in
 communications and contemporary language and as a joy to read When it was first published it broke ground in focusing on
 the comparative styles and prejudices of mainstream American and British newspapers and in its trenchant analysis of their
 systematic debasement of language in the face of obligatory platitudes and compulsory euphemisms Lasky documents the
 growing crisis affecting honest thoughtful and independent journalism in the Western world He extends the scope of his first
 volume in the trilogy and deepens the interpretation He also adds a personal touch of wit and anecdote as one might expect
 from an experienced international journalist and historian Lasky s examination of the use of formerly forbidden language is a
 triumph of sinuous semantics In his incisive analysis we see the tortuous struggle of a once Puritanized literary culture
 writhing to break free of censorship and self censorship This volume on the phenomenon of profanity adds another dimension
 to Lasky s thesis on mass culture s trivialization of real social and political phenomena It also underscores our society s
 embrace of banality in standardizing politically correct jargon and slang Readers of the first volume will find here a new
 range of references to illuminate the detail of what our newspapers have been publishing *Research for Writers* R.

 roots to the end of the 20th century by adopting both sociolinguistic and lexicographical perspectives It attempts to break out

 background of socio cultural observations thus relating the development of English lexicography to changes in English
 accomplishments in English linguistics social and cultural progress and advances in science and technology It unfolds a vivid
 coherent and complete picture of how English dictionary making develops from its archetype to the prescriptive the historical
 the descriptive and finally to the cognitive model how it interrelates to the course of the development of a nation s culture
 and the historical growth of its lexicographical culture as well as how English lexicography spreads from British English to
 other major regional varieties through inheritance innovation and self perfection This volume will be of interest to students
