*Spatial Justice in the City* Sophie Watson, 2019-11-04. In the context of increasing division and segregation in cities across the world along with pressing concerns around austerity, environmental degradation, homelessness, violence, and refugees, this book pursues a multidisciplinary approach to spatial justice in the city. Spatial justice has been central to urban theorists in various ways. Intimately connected to social justice, it is a term implicated in relations of power which concern the spatial distribution of resources, rights, and materials. Arguably, there can be no notion of social justice that is not spatial.

Philippopoulos Mihalopoulos has argued that spatial justice is the struggle of various bodies, human, natural, non-organic, technological, to occupy a certain space at a certain time. As such, urban planning and policy interventions are always to some extent at least about spatial justice. And as cities become ever more unequal, it is crucial that urbanists address questions of spatial justice in the city. To this end, this book considers these questions from a range of disciplinary perspectives. Crossing law, sociology, history, cultural studies, and geography, the book's overarching concern is with how to think spatial justice in the city. It brings a fresh perspective to issues that have concerned urbanists for several decades. The inclusion of empirical work in London brings the political, social, and cultural aspects of spatial justice to life. The book will be of interest to academics and students in the field of urban studies, sociology, geography, planning, space, law, and cultural studies.
