The New Authoritarianism in the Middle East and North Africa Stephen J. King, 2009-10-28 Stephen J King considers the reasons that international and domestic efforts toward democratization have failed to take hold in the Arab world Focusing on Egypt Tunisia Syria and Algeria he suggests that a complex set of variables characterizes authoritarian rule and helps to explain both its dynamism and its persistence King addresses but moves beyond how religion and the strongly patriarchal culture influence state structure policy configuration ruling coalitions and legitimization and privatization strategies He shows how the transformation of authoritarianism has taken place amid shifting social relations and political institutions and how these changes have affected the lives of millions Ultimately King s forward thinking analysis offers a way to enhance the prospects for democracy in the Middle East and North Africa

Western Imperialism in the Middle East 1914-1958 D. K. Fieldhouse, 2006-04-06 The term Fertile Crescent is commonly used as shorthand for the group of territories extending around the Rivers Tigris and Euphrates Here it is assumed to consist of Syria Lebanon Jordan Iraq and Palestine Much has been written on the history of these countries which were taken from the Ottoman empire after 1918 and became Mandates under the League of Nations For the most part the histories of these countries have been handled either individually or as part of the history of Britain or France In the first instance the emphasis has normally been on the development of nationalism and local resistance to alien control in a particular territory leading to the modern successor state In the second most studies have concentrated separately on how either France or Britain handled the great problems they inherited seldom comparing their strategies The aim of this book is to see the region as a whole and from both the European and indigenous points of view The central argument is that the mandate system failed

in its stated purpose of establishing stable democratic states out of what had been provinces or parts of provinces within the Ottoman empire Rather it generated basically unstable polities and in the special case of Palestine one totally unresolved and possibly unsolvable conflict The result was to leave the Middle East as perhaps the most volatile part of the world in the later twentieth century and beyond The main purpose of the book is to examine why this was so *Studies in the Economic History of the Middle East* M. A. Cook, 2015-12-22 First Published in 2004 Did medieval Muslims have the concept of a social class If not can we usefully employ the term in analysing their society Were there such things as guilds in the medieval Middle East Would we understand the economic decline of Mamluk Egypt better if we used paradigms derived from the study of the economic history of England and Italy in the fourteenth and fifteenth centuries How much can the enormous fiscal archive of the Ottoman Empire tell us about population history Why was the Middle East so backward if indeed it was compared with the rest of the Afro Asian world in the nineteenth century Have Iran and Iraq better prospects for economic growth than otherwise comparable countries thanks to their oil royalties Or are these paradoxically a hindrance rather than a help The study of the economic history of the Middle East in Islamic times is notoriously underdeveloped This volume contains papers discussed at an international conference held at the School of Oriental and African Studies in 1967 together with three short critical essays which attempt to tie them together Some papers are specific contributions to research others survey wider areas The volume is not a comprehensive history or a systematic inventory but it is hoped that in addition to presenting a set of papers which are interesting in themselves it will give the reader a tolerable idea of the state of studies in the field **The Middle East In Global Perspective** Judith Kipper, Harold Saunders, 2019-06-19 Well before events in the Soviet Union and Eastern Europe dramatized the rapidity with which a new political world is evolving and before the Gulf War sharpened the focus on the Middle East agenda scholars and policymakers alike were searching for different concepts for addressing the intractable problems facing the Middle East Even though the re **Women and War in the Middle East** Doctor Nicola Pratt, Doctor Nadjie Al-Ali, 2013-07-04 Women and War in the Middle East provides a critical examination of the relationship between gender and transnationalism in the context of war peace building and post conflict reconstruction in the Middle East Critically examining the ways in which the actions of various local and transnational groups including women's movements diaspora communities national governments non governmental actors and multilateral bodies interact to both intentionally and inadvertently shape the experiences of women in conflict situations and determine the possibilities for women's participation in peace building and post conflict reconstruction as well as the longer term prospects for peace and security The volume pays particular attention to the ways in which gender roles relations and identities are constructed negotiated and employed within transnational social and political fields in the conflict and post conflict situations and their particular consequences for women Contributions focus on the two countries with the longest experiences of war and conflict in the Middle East and which have been subject to the most prominent international interventions of recent years that is Iraq

and the Occupied Palestinian Territories Issues addressed by contributors include the impact of gender mainstreaming measures by international agencies and NGOs upon the ability of women to participate in peace building and post conflict resolution the consequences for gender relations and identities of the US led invasion and occupation of Iraq and how transnational feminist movements can most effectively support peace building and women s rights in the region Based entirely on original empirical research Women and War in the Middle East brings together some of the foremost scholars in the areas of feminist international relations feminist international political economy anthropology sociology history and Middle East studies

Rich And Poor States In The Middle East Malcolm H. Kerr, El Sayed Yassin, Jeswald Salacuse, Ismail Serageldin, 2019-06-04 While oil wealth has enriched some Middle East Arab nations others that lack oil resources have remained poor and are looking now to their oil rich neighbors for development assistance This collection of studies on the economic social and political relationships between the haves and the have nots in the Middle East focuses on Egypt the largest state in the region and on its prospects for change based on financial assistance from other Arab countries The authors have many disagreements about the future of both rich and poor nations in the Middle East and considerable skepticism about the possibility of transforming Egypt but they do agree that the future must be projected in the framework of a new regional order in which oil wealth labor migration and liberalized national economies are fundamental realities

The Middle East Water Question Tony Allan, 2001-11-22 Is there enough water on this planet for a global population that will shortly double its present size The answer is of huge importance for people everywhere but particularly to the peoples and political leaders of the Middle East and North Africa Already the region s economies are as dependant on water from outside the region as they are on the renewable waters of the region They will be much more dependant in the future Professor Allan s important new book aims to remove much of the confusion surrounding the issue of water in the Middle East As well as explaining the particular issues of conflict in the region he argues that the answer to these problems lies at the global rather than local level The national water policies of the region political as well as economic can only be properly understood at an international level And it is from this vantage point that solutions from rendering water globally available to addressing the environmental issues to do with its use must be found _The Middle East Water Question_ is a major book by one of the world s leading authorities on water issues the product of a decade of involvement with officials professionals Middle East and North African governments and international agencies such as the World Bank and FAO

As such, this textbook is invaluable to students of Middle Eastern politics. The ninth edition brings substantial changes. All chapters also have a uniform streamlined structure that explores the historical context, social and economic environment, political institutions, regime dynamics, and foreign policy of each country. Fact boxes and political maps are now far more extensive, and photographs and images also help illustrate key points. Annotated bibliographies are vastly expanded, providing nothing short of the best list of research references for each country.

This best-selling text offers a wealth of information to help readers not only comprehend more fully the world around them but also recognize and formulate policies that can more successfully engage the vitally important Middle East.

SDGs in Africa and the Middle East Region Ismaila Rimi Abubakar, Izael da Silva, Rudi Pretorius, Khaled Tarabieh, 2024-09-01 Africa is one of the most vulnerable regions, and one where the implementation of the SDGs is particularly urgent. Underinvestments in natural conservation are increasing the vulnerability of people across many African countries whose well-being is endangered by deteriorating socio-economic and environmental conditions. This volume provides a contribution towards showcasing how natural resources may be more efficiently used, and investments may be mobilised to augment the limited public sector funds available to achieve the SDGs. This book is part of the 100 papers to accelerate the implementation of the UN Sustainable Development Goals initiative.

Migration from North Africa and the Middle East Alessandra Venturini, Philippe Fargues, 2015-06-22 The countries of the Southern and Eastern Mediterranean (SEM) and those in Sub-Saharan Africa (SSA) are crucial to the development of the world economy. Highly skilled migration to and from these regions is key to the recent socio-political transformations that have occurred across the world. Despite this, in the states concerned, skilled migration remains an underlying issue of concern rather than at the top of political agendas, leading to a spectrum of unclear and uncoordinated legal and policy frameworks. Containing a series of thematic and country-specific overviews, this book highlights the specificity of each region and identifies and analyses key demographic, economic, legal, and political data, allowing for policy prescription. Skilled Migration, the brain drain, and its impact is an extensively debated phenomenon, and this will be an

Stanton, Edward Ramsamy, Peter J. Seybolt, Carolyn M. Kayal, 2019-03-28 This edited volume presents chapters on the dynamics of global climate change and global warming in the Middle East In this region it should be noted that even slightly warmer weather can result in an increased demand of energy along with its lower supply as well as lower labor productivity This text focuses on modeling simulation system dynamics and agent based modeling in dealing with these issues The latest decision making tools techniques and innovative solutions used to overcome these challenges are presented Many distinguished researchers

contribute their work herein The audience for this volume includes policy makers researchers and students unified by the common goal of making better decisions in the sustainable production and consumption of energy The practical orientation of the chapters within each part is intended to suit the practitioners managers and decision makers in the energy sector of the Middle East region **The Growth of Firms, Middle East Oil and Other Essays** Edith Penrose, 2019-04-18 Published in 1971 At first glance it might seem that the three subjects dealt with in the essays written over the last twenty years and now collected in this volume could hardly be more diverse beginning with the growth of the firm and moving from the international petroleum industry to the Middle East generally Oddly enough however these subjects are connected by the same type of historical logic that characterizes the diversification of an industrial firm the logic in the simple principle that one thing leads to another **Transnational Threats from the Middle East** Anthony H.
