The Consumer Under Socialist Planning Phillip J. Bryson, 1984 **The Consumer Under Socialist Planning** Phillip J. Bryson, 1984 **East German Distinctiveness in a Unified Germany** Jonathan Grix, P Cooke, 2003-02-28 This book explores the nature of the dramatic growth in a distinct sense of East German identity in the years since the events that led to formal unification in 1990 While it is problematic to see East Germanness as a singular and homogenous identity it can be perceived as a distinctive phenomenon and a level of identification that exists alongside local regional and national identities The essays in this volume hope to challenge the commonly held misconception that East German regional identity is a problem that needs to be overcome in the process of unification Through analyses of the social political and cultural behaviour of East Germans and their perception of their own place in German society this volume makes a complex and nuanced contribution to discussions on German national identity and the unification process *The East German Economy* Ian Jeffries, Manfred Melzer, Eleonore Breuning, 2017-06-14 Originally published in 1987 this book brings together leading authorities from Germany and the USA who analyze how the East German economy actually operated planning and management pricing investment and innovation the financial system agriculture and foreign trade including the special concessions granted by the then Federal Republic of Germany The volume is an insightful study of one of the least studied and most successful of socialist economies Socialist Economies and the Transition to the Market Ian Jeffries, 1993-05-27 First published in 1993 Routledge is an imprint of Taylor Francis an informa company The East German Economy, 1964 The Economy of East Central Europe, 1815-1989 David Turnock, 2004-03 From an expert in the field this major survey includes new research and recent changes in the region and reviewing two centuries of modernization examines the history of Eastern European economies within a wider political and ideological context East Germany in Comparative Perspective Thomas A. Baylis, Dr David Childs, Erwin L. economic reforms including industry agriculture the financial system and foreign trade and capital and the private sector The book provides information on the economic institutions of all the individual countries which is invaluable if the various courses of reform each country has engaged upon are to be understood Historical material supplements contemporary information in a work which is to be an essential reference for anyone engaged in a study of or trade with the socialist countries

The Economics of Henry George P. Bryson, 2011-07-14 Henry George the greatest most famous and most rejected of early American economists who trained himself in classical economics and developed a theory of a single tax There is much literature on many specific facets and aspects of George s work but we lack a book which provides an overview of George s economics until now

Socialism Phillip J. Bryson, 2015-10-09 Socialism Origins Expansion Decline and Attempted Revival in the United States This book is an attempt to address all the important economic aspects of socialism the concepts and theories the historical attempts to implement socialist economic systems and the endeavor to establish socialism in the United States Part I reviews the origins and ideas of socialism which reflect an aspiration radically to transform the market system the great advantages of which were explained by Adam Smith Part II reviews the establishment of Marxist Leninist economic systems in the USSR and the East European countries The movement featured central economic planning which survived from the 1920s until about 1990 its failure was the attempt of statist organization to crush the market system and replace it with Stalinist command planning Central planning was meticulously copied in the bloc countries of East Europe in China in India and elsewhere The national replications of central economic planning always produced the same disappointing usually disastrous results Efforts to reform the system always failed Meanwhile the democratic countries of Western Europe established socialist parties and policies but in less than a century after Marx the great hopes of socialism to achieve successful and productive nationalization of industries on the basis of a national economic plan had been recognized as unproductive and undesirable Part III reviews the failed attempt to establish a viable socialist party in the United States The real thrust toward socialism originally launched by the New Deal of Roosevelt came when Barak Obama a thoroughly indoctrinated and dedicated socialist ascended to the US presidency This socialism is an attempt to expand income redistribution and social welfare policies and to pursue massive industrial regulation and unconstitutional interventions in the private sector The implications of these policies are discussed together with the associated loss of market freedoms and personal liberties

Bryson, 2010-10-17 A comparative analysis of the process of public sector transition from central planning to market democracy It is the story of the difficulties and complexities of moving to a system of greater autonomy for the subnational governments of the Czech and Slovak Republics including the future of fiscal policies after the global recession

The Institutionalised Transformation of the East German Economy Sabine Spangenberg,2012-12-06 It is perhaps worth stressing that economic problems arise always and only in consequence of change So long as things continue as before or at least as they were expected to there arise no new problems requiring a decision no need to form a plan Hayek 1945 p 523 This book is based on my research for the degree of Doctor of Philosophy which I received from Lancaster University England in the second half of 1997 It is an analysis of the structural transformation of the economic system in East Germany and the behavioural relations these changes imply The approach of institutionalised transformation not the least by the creation of the Treuhandanstalt is examined with a theory based framework which is derived from system theoretical evolutionary and constitutional ethical considerations as well as from the newly developed adjustment model which has been constructed as a dynamic transformation approach A relationship between norm changes the new institutional framework of

the economic system and the compatibility of the latter with changes of the remaining partial societal systems is recognised Rigidity factors in the system s flexibility to react as well as the adjustment of economic behaviour to structural changes are analysed The marginal product of system change is defined section 2 8 2 **Economies in Transition** Ian

Jeffries,2013-05-13 This volume provides an in depth review of major economic developments in those economies which are in some stage of transition following the collapse of communism in the Eastern block The book is divided into four parts theoretical issues in the transition from command to market economies the events in the fifteen independent countries of the former Soviet Union Eastern Europe non European states In all the author chronicles events from 1993 to 1995 in thirty five countries Economic developments are set in their political context and presented chronologically as far as possible A Guide to the Economies in Transition carries on where Ian Jeffries previous book left off The work is entirely new and as such can be seen as a companion to the earlier title These books are becoming known as invaluable guides providing unique levels of reference in work of this type **Dysfunctional Bureaucracy** Bogdan Mieczkowski,1991 This book examines dysborgs
