The Contradictory Alliance State Labor Relations And Regime Change In Mexico Research Series No 83:

States' Gains, Labor's Losses Dorothy J. Solinger, 2018-07-05 In this explicitly comparative work Dorothy J Solinger examines the effects of global markets on the domestic politics of major states In the late 1970s leaders around the world faced a need both to continue productive investment and to cut labor costs to compete internationally in a changed world market To accommodate forces seemingly beyond their control they often opted to reduce social protections and benefits that citizens had come to expect in the process recalibrating their established political economic coalitions For countries whose governance was built on a coalition between workers and the state the political conundrum was particularly intense **States Gains Labor's Losses** concentrates on three countries China France and Mexico where revolution inspired political compacts between labor and the state had to be renegotiated In all three cases choices to forge a deepened dependence on international capital markets required the ruling parties to fire large numbers of workers and cut social benefits while attempting not to provoke widespread social unrest or even full scale revolt among their supporters China France and Mexico also shared strong legacies of protectionism and state intervention in the economy so the decision of each to join a supranational economic organization France and the EU China and the GATT WTO Mexico and NAFTA in the hope of alleviating crises of capital shortage involved submission to a new set of liberal economic rules that further compromised their sociopolitical compacts Examining a fundamental question about the dynamics of globalization and worker protest through an innovative comparative perspective **States Gains Labor's Losses** emphasizes the growing tensions and new compromises between the working class and their political leaders in the face of intense international economic pressures

The Contradictory Alliance Ruth Berins Collier, 1992 **Mexico** Daniel C. Levy, Kathleen Bruhn, Emilio Zebadúa, 2006-01-26 Summary This text offers an analysis of Mexico's struggle for democratic development Linking Mexico's state to Mexico US and other international considerations the authors collaborating with Emilio Zebadua offer perspectives from all sides of the border **Organizing Dissent** Maria Lorena Cook, 2010-11-01 Stalled Democracy Eva Bellin, 2018-07-05 In this ambitious book Eva Bellin examines the dynamics of democratization in late developing countries where the process has stalled Bellin focuses on the pivotal role of social forces and particularly the reluctance of capital and labor to champion democratic transition contrary to the expectations of political economists versed in earlier transitions Bellin argues that the special conditions of late development most notably the political paradoxes created by state sponsorship fatally limit class commitment to democracy In many developing countries she contends those who are empowered by capitalist industrialization become the allies of authoritarianism rather than the agents of democratic reform Bellin generates her propositions from close study of a singular case of stalled democracy Tunisia Capital and labor's complicity in authoritarian relapse in that country poses a puzzle The author's explanation of that case is made more general through comparison with the cases of other countries including Mexico Indonesia South Korea Turkey and Egypt Stalled

Democracy also explores the transformative capacity of state sponsored industrialization By drawing on a range of real world examples Bellin illustrates the ability of developing countries to reconfigure state society relations redistribute power more evenly in society and erode the peremptory power of the authoritarian state even where democracy is stalled *Logics of Resistance* Steve Dubb,2014-02-04 This study examines how unions representing telephone workers one in Mexico and one in British Columbia Canada have responded to changes in technology work organization and government policy stemming from the rise of a more global economy Some business writers have suggested that globalization will compel unions to cooperate with managers as workers are more exposed to international competition By analyzing the actual record of two unions in the highly internationalized telecommunications industry however a different picture emerges *The Decline of Democracy in Turkey* Kürşat Çınar,2019-05-16 This book explores the roots of the decline of democracy and the rise of hegemonic parties in Turkey by comparing the Justice and Development Party AKP with other comparable cases throughout the world Offering a novel analysis in the rise of hegemonic parties this book incorporates the analysis of state society relations and institutionalist approaches A hegemonic party is a single political party that dominates the scene in multi party elections for extended periods of time Focusing on the cases of Turkey Azerbaijan Malaysia Russia and other countries through the Middle East Asia Latin America Africa and Europe the book proves that hegemony building is possible through the combination of societal and institutional factors at the individual local and national levels Multilingual comparative content analysis rigorous statistical tests and in depth elite level interviews support this theory based on an extensive fieldwork analysis Analysing contemporary as well as historical cases of hegemonic parties the volume will be of interest to researchers and students in a broad range of areas including democratization political parties and Turkish politics

Constructing Human Rights in the Age of Globalization Mahmood Monshipouri,Neil Englehart,Andrew J. Nathan,Kavita Philip,2015-06-01 Both human rights and globalization are powerful ideas and processes capable of transforming the world in profound ways Notwithstanding their universal claims however the processes are constructed and they draw their power from the specific cultural and political contexts in which they are constructed Far from bringing about a harmonious cosmopolitan order they have stimulated conflict and opposition In the context of globalization as the idea of human rights has become universal its meaning has become one more terrain of struggle among groups with their own interests and goals Part I of this volume looks at political and cultural struggles to control the human rights regime that is the power to construct the universal claims that will prevail in a territory with respect to property the state the environment and women Part II examines the dynamics and counterdynamics of transnational networks in their interactions with local actors in Iran China and Hong Kong Part III looks at the prospects for fruitful human rights dialogue between competing universalisms that by definition are intolerant of contradiction and averse to compromise **Research Series** ,1992 The Logics of Resistance Steve Dubb,1996 **Politics of the Modern Arab World** Laleh Khalili,2009 Covers the Arab world from Morocco to the

borders of Iran with the focus primarily on the 20th Century By choosing a wide array of authors many of whom are from the region or from the non Anglophone world the full breadth of worldwide scholarship on the modern Arab world is on display

Pernicious Foreigners and Contested Compatriots Lore Diana Kuehnert,2002 **Current Bibliographical Information** Dag Hammarskjöld Library,1993 *Debt Games* Vinod K. Aggarwal,1996-04-26 International debt rescheduling both in earlier epochs and our present one has been marked by a flurry of bargaining In this process significant variation has emerged over time and across cases in the extent to which debtors have undertaken economic adjustment banks or bondholders have written down debts and creditor governments and international organizations have intervened in negotiations Debt Games develops and applies a situational theory of bargaining to analyze the adjustment undertaken by debtors and the concessions provided by lenders in international debt rescheduling This approach has two components a focus on each actor s individual situation defined by its political and economic bargaining resources and a complementary focus on changes in their position The model proves successful in accounting for bargaining outcomes in eighty four percent of the sixty one cases which include all instances of Peruvian and Mexican debt rescheduling over the last one hundred and seventy years as well as Argentine and Brazilian rescheduling between 1982 and 1994 **The Future of European Security** ,1992 ,1993 **Contesting Authoritarianism** Dina Bishara,2018-08-30 Successive authoritarian regimes have maintained tight control over organized labor in Egypt since the 1950s And yet in 2009 a group of civil servants decided to exit the state controlled Egyptian Trade Union Federation ETUF thereby setting a precedent for other groups and threatening the ETUF s monopoly Dina Bishara examines this relationship between labour organizations and the state to shed light on how political change occurs within an authoritarian government and to show how ordinary Egyptians perceive the government s rule In particular Bishara highlights the agency of dissident unionists in challenging the state even when trade union leaders remain loyal She reveals that militant sectors are more vulnerable to greater scrutiny and repression and that financial benefits tied to membership in state backed unions can provide significant disincentives against the exit option Moving beyond conventional accounts of top down control this book explores when and how institutions designed for political control become contested from below *Political Parties in Russia* Alexander Dallin,1993 **Lessons of the Gulf War** Gene I. Rochlin,1977 **Networks, Neoliberalism, and NAFTA** Benjamin P. Gochman,1998
