early stages of riding People often forget to begin at the beginning A child doesn't walk first they crawl The same thing goes for speech A child starts out making sounds before they begin to formulate words A lot of this is sometimes caused by people who are trying to be helpful by giving advice but are just confusing and scaring new riders unnecessarily Make no mistake motorcycling has its dangers just like anything else in life but continual training will help you to deal with whatever may come your way I created New Motorcycle Riders as an alternate source of learning for motorcyclists to help them learn the things that are not taught in classrooms Motorcycle courses are designed to teach you the basics but your real world experience is going to come when you hit the streets Motorcycling is a wonderful feeling so much that I couldn't imagine not doing it When I started riding things were very different There was no formal training and what you learned was limited to those who you were around Some of the terms that are used today weren't used back then even though many of the same principles they speak of today were implemented then Modern technology has made things that were impossible yesterday very possible today Not only have motorcycles progressed but motorcycle riders have too New Motorcycle Riders bridges the gap between riders from all over the world to help riders share information and experiences with others that could be beneficial to them We have one of the most diverse group of motorcyclists anywhere After reading this handbook I am certain you will recognize the value of the material and will have a clearer picture of how to properly train to be a motorcycle rider Enjoy the book and safe travels
