The Condom Industry In The United States:

The Condom Industry in the United States James S. Murphy, 1990 The AIDS epidemic and the spread of other sexually transmitted diseases have drawn attention once again to the condom as a contraceptive and a protective agent against infection Experts are touting the age old condom as an important aspect of safe sex Controversial television commercials and billboards are advocated by worried governments The historical background and evolution of the industry the manufacturing process cost factors the distribution structure competition regulation consumer acceptance societal costs and profits are explained from an economic point of view **A History of the Birth Control Movement in America** Peter C.

Engelman, 2011-04-19 This narrative history of one of the most far reaching social movements in the 20th century shows how it defied the law and made the use of contraception an acceptable social practice and a necessary component of modern healthcare A History of the Birth Control Movement in America tells the extraordinary story of a group of reformers dedicated to making contraception legal accessible and acceptable The engrossing tale details how Margaret Sanger's campaign beginning in 1914 to challenge anti obscenity laws criminalizing the distribution of contraceptive information grew into one of the most far reaching social reform movements in American history The book opens with a discussion of the history of birth control methods and the criminalization of contraception and abortion in the 19th century Its core however is an exciting narrative of the campaign in the 20th century vividly recalling the arrests and indictments banned publications imprisonments confiscations clinic raids mass meetings and courtroom dramas that publicized the cause across the nation Attention is paid to the movement's thorny alliances with medicine and eugenics and especially to its success in precipitating a profound shift in sexual attitudes that turned the use of contraception into an acceptable social and medical practice Finally the birth control movement is linked to court won privacy protections and the present day movement for reproductive rights

Devices and Desires Andrea Tone, 2002-05 From thriving black market to big business the commercialization of birth control in the United States In *Devices and Desires* Andrea Tone breaks new ground by showing what it was really like to buy produce and use contraceptives during a century of profound social and technological change A down and out sausage casing worker by day who turned surplus animal intestines into a million dollar condom enterprise at night inventors who fashioned cervical caps out of watch springs and a mother of six who kissed photographs of the inventor of the Pill these are just a few of the individuals who make up this riveting story **The Condom, Increasing Utilization in the United States** Myron

H. Redford, Gordon W. Duncan, Denis J. Prager, 1974 *Disciplinary and Dissent in Cultural Studies* Cary Nelson, Dilip Gaonkar, 2013-10-28 First published in 1996 As recently as the early 1990s people wondered what was the future of cultural studies in the United States and what effects its increasing internationalization might have What type of projects would cultural studies inspire people to undertake Would established disciplines welcome its presence and adapt their practices accordingly *Disciplinary and Dissent in Cultural Studies* answers such questions It is now clear that while striking and

innovative work is underway in many different fields most disciplinary organizations and structures have been very resistant to cultural studies Meanwhile cultural studies has been subjected to repeated attacks by conservative journalists and commentators in the public sphere Cultural studies scholars have responded not only by mounting focused critiques of the politics of knowledge but also by embracing ambitious projects of social political and cultural commentary by transgressing all the official boundaries of knowledge in a broad quest for cultural understanding This book tracks these debates and maps future strategies for cultural studies in academia and public life The contributors to *Disciplinary and Dissent in Cultural Studies* include established scholars and new voices In a series of polemic and exploratory essays written especially for this book they track the struggle with cultural studies in disciplines like anthropology literature and history and between cultural studies and very different domains like Native American culture and the culture of science Contributors include Arjun Appadurai Michael Denning Lawrence Grossberg Cary Nelson Constance Penley Andrew Ross and Lynn Spigel

In the 1920s a few Cleveland women perceived a need for reliable birth control They believed that health and social service professionals denied women especially poor and working class women critical health care information Any Friend of the Movement tells the story of these women their actions and the organization they created the direct forerunner of a modern Planned Parenthood affiliate The disparate threads of this particular tale include the suicide of a pregnant woman the gift of a bereaved inventor smuggling contraceptive supplies across state lines and sponsoring ice skating galas to fund the work Any Friend of the Movement breaks new ground in the history of birth control activism in North America Meyer argues that private philanthropy and voluntary action on the part of clinics like the Maternal Health Association MHA and their clients vitalized the larger movement at its roots and pushed it forward BOOK JACKET Title Summary field provided by Blackwell North America Inc All Rights Reserved **Social Equity in a Post-Roe America** Lorenda A. National Library of Medicine Current Catalog National Library of Medicine (U.S.), 1993 **Protective Practices** Jessica Borge, 2020-09-23 From humble beginnings wholesaling at a small tobacconist hairdresser shop in 1915 the London Rubber Company rapidly became the UK's biggest postwar producer and exporter of disposable rubber condoms A first mover and innovator the company's continuous product development and strong brands including Durex allowed it to dominate supply to the retail trade and family planning clinics leading it to intercede in the burgeoning women's market When oral contraceptives came along however the company was caught in a bind between defending condoms against the pill and claiming a segment of the new birth control market for itself In this first major study on the company Jessica Borge shows how despite the unmentionable status of condoms that inhibited advertising in the early twentieth century aggressive business practices were successfully deployed to protect the monopoly and squash competition Through close evidence based examination of LRC's first fifty years encompassing its most challenging decades the 1950s and 1960s as well as an overview of later years including the AIDS crisis Borge argues that the story of the modern disposable condom in Britain is really the story of the London Rubber Company the circumstances that befell it the struggles that beset it the causes that opposed it and the opportunities it created for itself LRC's historic intervention in and contribution to female contraceptive practices sits uneasily with existing narratives centred on women's control of reproduction but the time has come Borge argues for the condom to find its way back to the centre of these debates *Protective Practices* thereby re-examines a key transitional moment in social and cultural history through the lens of this unusual case study
