The Mental Aftermath Klaus Hentschel,2007-06-14 Few scientific communities have been more thoroughly studied than 20th century German physicists Yet their behaviour and patterns of thinking immediately after the war remains puzzling During the first five post war years they suspended their internecine battles and a strange solidarity emerged Former enemies were suddenly willing to exonerate each other blindly and even morally upright physicists began to write tirades against the denazification mischief or the export ofscientists Personal idiosyncrasies melded into a strangely uniform pattern of rejection or resistance to the Allied

occupiers with attendant repressed feelings and self pity Politics was once again perceived as remote dirty business It was feared that the least concession of guilt would bring down even more severe sanctions on their discipline Using tools from the history of mentality such as analysis of serial publications these tendencies are examined The perspective of emigr physicists as reflected in their private letters and reports embellish this portrait *Global Economic Disparity* Jae Wan Chung, 2015-04-09 The world is a veritable stage for superpowers Major historical events are best viewed as the outcomes of games played by superpowers for their own economic interests The objective of this book is to explore the primary cause of global historical events A global economic disparity GED motivates superpowers to pursue their interests and results in the corresponding global historical event GHE This book explores the causal relationships between GEDs and GHEs that stand out in recent global history since the first Industrial Revolution taking a geoeconomic approach which encompasses economics international political affairs history and geography The book confirms the causalities between GEDs and GHEs It is a pioneering work that provides a unique but powerful policy implication in order to alleviate international conflicts and tensions between superpowers it is necessary to reduce GEDs And since it is virtually impossible for a few superpowers to reduce the GEDs the world economy needs a multipolar economic system for global stability through competition The book was written shortly after the world economy was trapped within downward spirals caused by the US financial crisis and its contagion As a collective representation of GEDs in various areas the financial disparity is a central part of GEDs The book rigorously examines the financial crisis 2008 2014 in the United States and the Fed's response a program of quantitative easing QE implemented in three phases while bearing in mind that the origin of the current crisis is not solely the financial sector or stock markets but worldwide economic disequilibrium This book also focuses on the details for the causal relationships prevailing in several major areas human resources raw materials energy environment and poverty

Innovations in Teaching and Learning for Health Professions Educators Roger Edwards, Bobbie Ann Adair White, Ardi Findyartini, 2025-06-02 The health professions continue to evolve and change rapidly as more opportunities and challenges emerge Hence health professions educators are required to be adaptive and nimble in their creation and adoption of teaching and learning innovations These innovations have included teaching with technologies like virtual reality gamification online applications and artificial intelligence Innovations also include know how such as emotional intelligence and ways of approaching the learning process through student centered learning experiences grounded in the cognitive science of learning Scholarship related to identification of the best uses of different innovations is difficult The same innovations have proven to be engaging in some contexts and burdensome in others Additionally simulation based education continues to incorporate innovations in how health professions educators are taught with more focus on effectiveness of the simulation educator including applications with distance simulation Training and development for health professions and simulation educators is becoming more formalized yet gaps on effectiveness of training and development efforts persist

Faculty effectiveness especially as it relates to educational innovation adoption is difficult to measure and demonstration of related competencies is in its infancy The goal of this Research Topic is to bring together state of the art examples of scholarship in health professions education related to the awareness and appropriate adoption of innovation which is broadly defined as an idea practice technology and know how Evidence about the current state of emerging innovations effectiveness of innovations and evidence about the competencies needed for teaching in our evolving environments are all areas of interest for this collection All types of scholarship can support this focus including analyses based on primary quantitative and qualitative data collection secondary data analyses literature reviews and methodological infrastructure tool development Additionally scholarship investigating how these innovations have influenced health professions educators including their training and development is part of the goal of the collection The scope of this collection covers any innovations that are applicable to professional development and implementation for health professions educators More specifically we invite scholarship related to how educators prepare themselves for meeting the needs of their students given the changing roles and innovations available to both faculty and students across learning environments worldwide Examples of topics of interest include Analyses of innovation related to the evolving roles of health professions educators Reviews of educational innovation adoption by health professions education faculty especially related to artificial intelligence linked applications Exploring factors associated with professional development training and effective educational innovation adoption by faculty Simulation based educational innovation applications for faculty development Faculty innovation in resource constrained environments in low and middle income countries Methodological challenges associated with studying educational innovations by faculty in health professions education and critical research needs associated with generating and evaluating educational innovations Methodological considerations associated with health professions education faculty competencies Theoretically focused analyses are welcome as long as they are linked to applications

Research Grants 2008 Schoolhouse Partners Llc,2008-05 It was the 50s and life was simple until September 25 1954 That was the night that would be etched in the memory of the citizens of Stanfield Massachusetts The Chief of Police described the brutal savagery of the double homicide as the most atrocious crime in the history of the city A fourteen year old girl and the four year old boy in her care were murdered at the hands of a deranged depraved killer A Thread of Evidence places the reader at the scene of the crime an eye witness to the senseless stabbing of two innocent children With a piece of crochet thread as their only clue the entire police department lead by detectives Steven Logan and Raymond Gage scour the city in search of a maniacal savage When all tips and leads have been exhausted they review all evidence They come back to the thread The only real evidence With tenacity and perseverance of Logan and Gage the killer is apprehended The reader experiences the twists and turns of the investigation and ultimately occupies a reserved seat in the Superior Court as the trial proceedings commence A Thread of Evidence has been written as fiction but inspired by an actual event Fifty years later

it remains etched in the minds of all who had lived in the area The author has researched court records newspapers interviewed neighbors police and has drawn on personal recollections of the crime The story has been recounted over and over and to this day it continues to be discussed A Thread of Evidence is a compelling account of superb detective work and unprecedented dedication of an entire police department

Elizabethan Diplomacy and Epistolary Culture Elizabeth R. Williamson, 2021-05-23 A new account of Elizabethan diplomacy with an original archival foundation this book examines the world of letters underlying diplomacy and political administration by exploring a material text never before studied in its own right the diplomatic letter book Author Elizabeth R Williamson argues that a new focus on the central activity of information gathering allows us to situate diplomacy in its natural context as one of several intertwined areas of crown service and as one of the several sites of production of political information under Elizabeth I Close attention to the material features of these letter books elucidates the environment in which they were produced copied and kept and exposes the shared skills and practices of diplomatic activity domestic governance and early modern archiving This archaeological exploration of epistolary and archival culture establishes a new tier of state actor that participates in even defines a notably early modern growth in administration and information management Extending this discussion to our own conditions of access a new parallel is drawn across two ages of information obsession as Williamson argues that the digital has a natural place in this textual history that we can no longer ignore This study makes significant contributions to epistolary culture diplomatic history and early modern studies more widely by showing that understanding Elizabethan diplomacy takes us far beyond any single ambassador or agent defined as such it is a way into an entire administrative landscape and political culture
