Solidarity in Strategy Lyn Spillman, 2012-07-27 Popular conceptions hold that capitalism is driven almost entirely by the pursuit of profit and self interest Challenging that assumption this major new study of American business associations shows how market and non market relations are actually profoundly entwined at the heart of capitalism In Solidarity in Strategy Lyn Spillman draws on rich documentary archives and a comprehensive data set of more than four thousand trade associations from diverse and obscure corners of commercial life to reveal a busy and often surprising arena of American economic activity From the Intelligent Transportation Society to the American Gem Trade Association Spillman explains how business associations are more collegial than cutthroat and how they make capitalist action meaningful not only by developing shared ideas about collective interests but also by articulating a disinterested solidarity that transcends those interests Deeply grounded in both economic and cultural sociology Solidarity in Strategy provides rich lively and often surprising insights into the world of business and leads us to question some of our most fundamental assumptions about economic life and how cultural context influences economic

Economic Lives Viviana A. Zelizer, 2013-03-24 Revealing the human side of economic life Over the past three decades economic sociology has been revealing how culture shapes economic life even while economic facts affect social relationships This work has transformed the field into a flourishing and increasingly influential discipline No one has played a greater role in this development than Viviana Zelizer one of the world's leading sociologists Economic Lives synthesizes and extends her most important work to date demonstrating the full breadth and range of her field defining contributions in a single volume for the first time Economic Lives shows how shared cultural understandings and interpersonal relations shape everyday economic activities Far from being simple responses to narrow individual incentives and preferences economic actions emerge persist and are

transformed by our relations to others Distilling three decades of research the book offers a distinctive vision of economic activity that brings out the hidden meanings and social actions behind the supposedly impersonal worlds of production consumption and asset transfer Economic Lives ranges broadly from life insurance marketing corporate ethics household budgets and migrant remittances to caring labor workplace romance baby markets and payments for sex These examples demonstrate an alternative approach to explaining how we manage economic activity as well as a different way of understanding why conventional economic theory has proved incapable of predicting or responding to recent economic crises Providing an important perspective on the recent past and possible futures of a growing field Economic Lives promises to be widely read and discussed *Handbook of Classical Sociological Theory* Seth Abrutyn, Omar Lizardo, 2021-11-01 This is the first handbook focussing on classical social theory It offers extensive discussions of debates arguments and discussions in classical theory and how they have informed contemporary sociological theory The book pushes against the conventional classical theory pedagogy which often focused on single theorists and their contributions and looks at isolating themes capturing the essence of the interest of classical theorists that seem to have relevance to modern research questions and theoretical traditions This book presents new approaches to thinking about theory in relationship to sociological methods
