Sacred and Secular Pippa Norris, Ronald Inglehart, 2011-10-17 This book develops a theory of existential security It demonstrates that the publics of virtually all advanced industrial societies have been moving toward more secular orientations during the past half century but also that the world as a whole now has more people with traditional religious views than ever before This second edition expands the theory and provides new and updated evidence from a broad perspective and in a wide range of countries This confirms that religiosity persists most strongly among vulnerable populations especially in poorer nations and in failed states Conversely a systematic erosion of religious practices values and beliefs has occurred among the more prosperous strata in rich nations

Avison,Carol S. Aneshensel,Scott Schieman,Blair Wheaton,2009-10-21 In 1981 Leonard Pearlin and his colleagues published an article that would radically shift the sociological study of mental health from an emphasis on psychiatric disorder to a focus on social structure and its consequences for stress and psychological distress Pearlin et al 1981 proposed a deceptively simple conceptual model that has now influenced sociological inquiry for almost three decades With his characteristic penchant for reconsidering and elaborating his own ideas Pearlin has revisited the stress process model periodically over the years Pearlin 1989 1999 Pearlin et al 2005 Pearlin and Skaff 1996 One of the consequences of this

continued theoretical elaboration of the stress process has been the development of a sociological model of stress that embraces the complexity of social life. Another consequence is that the stress process has continued to stimulate a host of empirical investigations in the sociology of mental health. Indeed it is no exaggeration to suggest that the stress process paradigm has been primarily responsible for the growth and sustenance of sociological research on stress and mental health. Pearlin et al 1981 described the core elements of the stress process in a brief paragraph. The process of social stress can be seen as combining three major conceptual domains: the sources of stress, the mediators of stress, and the manifestations of stress. Each of these extended domains subsumes a variety of subparts that have been intensively studied in recent years.

Religion and Politics Under Capitalism Stefan Arvidsson, 2019-04-17 This book relates some of the major trends within religion and politics to offer a historical framework with which to assess their interactions and a point of departure for studies to come. The study of the interrelationship between contemporary religious practice and modern politics is divided between several scholarly disciplines, all embracing different terminologies as well as multiple theoretical and philosophical premises. Such diversity of perspectives is to be welcomed but it can inhibit the ability of academics to form a cohesive and coherent dialogue around the subject. While critically assessing the historic sociological, political, theological, and anthropological aspects of religion and politics, the book demonstrates the crucial importance of recognising the capitalist economy as the framework for understanding their dynamic relationship. Moreover, it claims that humanism is the proper lens through which to critically engage with religion in society and must be the favoured point of departure for any study within the field. This book offers a unique overarching viewpoint for all these divergent scholarly trends and traditions. As such, it will be of significant use to academics in religious studies, political science, sociology, and anthropology.

Religion in the Era of Postsecularism Uchenna Okeja, 2019-08-22 Exploring the viability of new perspectives on secularisation and the idea of postsecularism, this book reflects on their relevance when considered in the context of different societies within and outside the West. The topic of secularisation has been recently reconsidered by prominent theorists such as Jürgen Habermas, Talal Asad, Charles Taylor, and José Casanova. Offering a comparative critique of postsecularism, the contributors extend the discourse on postsecularism to include non-Western experiences, providing comprehensive perspectives on the role of religion in the public sphere and considering the validity of the concept of postsecularism. Drawn from a variety of disciplines, the contributors articulate a coherent analysis of the role of religion in the public sphere from a perspective that engages in the envisaged dialogue. This insightful book will be important for those researching secularism and postsecularism, especially from a non-Western perspective, and it will also be of interest to scholars working on politics and religion in general, political philosophy, and African studies.

Indian flag disappeared from movie backdrops This book seeks to answer these important questions The book also compares Bollywood and Hollywood movies showing how the latter has created a yearning for the American way of life Films influence public opinion and behaviour If that weren't true movies like Aandhi 1975 Kissa Kursi Ka 1977 and Black Friday 2005 wouldn't have faced bans Cinema shapes society and Bollywood must recognise its power and the responsibility that comes with it
