Sociology Of Education And Work:

The Sociology of Education and Work David B. Bills, 2004-09-24 A study of the links between schooling and the workplace in modern society It explains how these links have developed over time what broad social trends are transforming them now and offers some empirically based projections about how these relationships are likely to develop in the future **The**

Sociology of Education David B. Bills, 2022-12-27 The Sociology of Education examines the many different and often conflicting goals and visions that both individuals and societies have for schools and for education Sets education in its social context and provides broad based and distinctive coverage of the sociology of education Focuses on the contemporary United States but draws upon material from other societies and historical periods Examines how education operates throughout the lifecourse even after people have left formal schooling Looks at how education interacts with other social institutions and how schooling contributes to or detracts from broad patterns of social inequality and privilege Takes full account of the individual and social goals of schooling **Ideology, Curriculum, and the New Sociology of Education** Lois

Weis, Cameron McCarthy, Greg Dimitriadis, 2006 First Published in 2006 Routledge is an imprint of Taylor Francis an informa company **Education, Work and Identity** Michael Tomlinson, 2013-02-14 Education Work and Identity explores changing patterns of education and work the dynamic relationship between these two institutions and the wider social and economic contexts shaping them It locates this in processes of social and economic change in particular the shift towards globalization and the post industrial economy The book examines how these changes have reshaped individuals educational transitional and labour market experiences It also explores key themes and approaches in understanding the education and labour market interplay and the way in which education and work institutions shape people s orientations and identities around work *Understanding Contemporary Issues in Higher Education* Brendan Bartram, 2020-10-29 This insightful book offers a

wide ranging collection of lively discussions on contemporary issues policies and practices in higher education Bartram integrates contributions from experienced academics teachers and students in a unique approach and structure designed to enable students with both specific and wide ranging interests in higher education to extend their understanding Including discussion points research tasks and suggestions on further reading in each chapter *Understanding Contemporary Issues in Higher Education* discusses a range of topics such as universities and the mental health crisis knowledge the state and the market the role of technology in teaching and academic celebration disability diversity and inclusive placement learning Written specifically for Education Studies students this book constitutes a timely addition to student focused themed studies looking at aspects of higher education *Education, Work and Social Change in Britain's Former Coalfield Communities*

Robin Simmons, Kat Simpson, 2022-10-17 This edited book presents a range of chapters written by new and established authors drawing on a range of different perspectives and traditions to critically analyse education work and social change in the former coalfields Historically coal was one of Britain s major industries employing over a million men at its peak But

mining was more than an occupation it was a way of life for those living and working in coalfield communities Work leisure family relations and other dimensions of social life were centred upon the coal industry and its related institutions such as trade unions working men s clubs and welfare institutes These communities have however undergone significant social and economic change over time not least in terms of the pain and suffering associated with the Great Strike of 1984 85 the successive waves of pit closures which took place thereafter and the eventual demise of the coal industry The book will be of interest to academics drawing on sociology social policy history geography and other subject disciplines **Handbook of the Sociology of Education in the 21st Century** Barbara Schneider,2019-11-03 **The Sociology of Education** Jeanne Ballantine,Floyd M. Hammack,2015-07-22 Putting Sociology to Work Chapter 4 Gender Race and Class Attempts to Achieve Equality of Educational Opportunity Gender and Equality of Educational Opportunity Class Race and Attempts to Rectify Inequalities in Educational Opportunity Integration Attempts Educational Experience of Selected Minorities in the United States Improving Schools for Minority Students Summary Putting Sociology to Work Chapter 5 The School as an Organization The Social System of the School Goals of the School System The School as an Organization The Working Classes and Higher Education Amy E. Stich,Carrie Freie,2015-12-22 Within the broader context of the global knowledge economy wherein the college for all discourse grows more and more pervasive and systems of higher education become increasingly stratified by social class important and timely questions emerge regarding the future social location and mobility of the working classes Though the working classes look very different from the working classes of previous generations the weight of a universal working class identity background amounts to much of the same economic vulnerability and negative cultural stereotypes all of which continue to present obstacles for new generations of working class youth many of whom pursue higher education as a necessity rather than a choice Using a sociological lens contributors examine the complicated relationship between the working classes and higher education through students distinct experiences challenges and triumphs during three moments on a transitional continuum the transition from secondary to higher education experiences within higher education and the transition from higher education to the workforce In doing so this volume challenges the popular notion of higher education as a means to equality of opportunity and social mobility for working class students

Working in Class Allison L. Hurst,Sandi Kawecka Nenga,2016-01-18 More students today are financing college through debt but the burdens of debt are not equally shared The least privileged students are those most encumbered and the least able to repay All of this has implications for those who work in academia especially those who are themselves from less advantaged backgrounds Warnock argues that it is difficult to reconcile the goals of facilitating upward mobility for students from similar backgrounds while being aware that the goals of many colleges and universities stand in contrast to the recruitment and support of these students This combined with the fact that campuses are increasingly reliant on adjunct labor makes it difficult for the contemporary tenure track or tenured working class academic to reconcile his or her position

in the academy **Education, Work and Social Change** R. Simmons,R. Thompson,L. Russell,2014-06-17 Drawing on a longitudinal study of the lives of NEET young people this book looks beyond dominant discourses on youth unemployment to provide a rich detailed account of young people s experiences of participation and non participation on the margins of education and employment highlighting the policy implications of this research Neoliberalism, Gender and Education Work Sarah A. Robert,Heidi Pitzer,Ana Luisa Muñoz García,2019-12-18 How does neoliberalism in the education field shape who teachers are and what they can be What are the effects of neoliberal logic on students How is gender at the core of what it means to teach and learn in neoliberal educational institutions Neoliberalism Gender and Education Work examines the everyday labour of educating in a variety of contexts in order to answer these questions in new and productive ways Neoliberal ideals of standardisation accountability and entrepreneurialism are having undeniable effects on how we define teaching and learning Gender is central to these definitions with care work and other forms of affective labour simultaneously implicated in standards of teacher quality and undervalued in metrics of assessment Gathering research from across four continents and education settings ranging from elementary school to higher education to popular social movements the methodologically diverse case studies in this book offer insight into how teachers and students negotiate the intertwined logics of neoliberalism and gender Beyond an indictment of contemporary institutions Neoliberalism Gender and Education Work provides inspiration with its documentation of the creative practices and selfhoods emerging in the cracks of the neoliberal ideological apparatus It was originally published as a special issue of Gender and Education Adult and Continuing Education: Vocational education Peter Jarvis,Colin Griffin,2003 Depicting the ways that adult education has evolved as society has changed and how it has been incorporated into lifelong learning this is a truly unique set that puts a stamp on an exciting field and important far reaching issues These five volumes represent a great advance to scholars as this is the first comprehensive overview of the field The set draws on books journals reports and historical papers to map the vast field of education for adults The writings included in the set have influenced the development of both the practice and the study of adult education from the Guilds to vocational education distance learning and leisure learning The collection also covers the recent emergence of corporations as new providers of education for adults with the corporate classroom corporate universities and consultancies A detailed index and new introduction by the editor will help the reader navigate this wealth of diverse material **Positional Competition and Social Inequality in Graduate Careers** Ulpukka Isopahkala-Bouret,Gerbrand Tholen,Agnès van Zanten,2025-03-18 This book examines how social inequalities in higher education shape the positional competition in graduate labour markets Featuring research from Europe North America and China the book provides new insights into graduate careers by examining how graduates from various backgrounds navigate their labour market trajectories in different national contexts Based on in depth case studies it demonstrates how the opportunities for graduates in the labour market do not solely depend on individual skills experience and abilities but on how

other graduates act within the labour market and the different forms of capital they possess This book delineates the social cultural and educational conditions through which positional competition becomes meaningful to employers and graduates It explains why employers value and seek out university graduates when hiring and demonstrates how the value of educational credentials interacts with graduates gender ethnicity and social class positions Furthermore it addresses how regional inequalities influence graduates employment opportunities This book is essential for university students and scholars policymakers and anyone interested in the recruitment of graduates It was originally published as a special issue of the *Journal of Education and Work* *From Adult Education to the Learning Society* Peter Jarvis, 2013-01-11 This unique text provides a valuable route map to the development of thinking in adult education and lifelong learning It includes more than twenty five seminal articles from the first two decades of the *International Journal of Lifelong Education* written by leading authors in the field from the UK the USA Australia and Europe Compiled to show the development of the field the articles are divided into four sections From Adult Education to Lifelong Education and Lifelong Learning to the Learning Society and Beyond The specially written Introduction by the editor contextualises the selection and introduces readers to the main issues and current thinking in the field This is the only text of its kind to demonstrate practice and policy internationally over this period and as the collection of articles are now available in one easy access place this is an excellent resource for students and scholars *Lifelong Learning in Paid and Unpaid Work* D.W. Livingstone, 2015-04-08 Lifelong Learning is essential to all individuals and in recent years has become a guiding principle for policy initiatives ranging from national economic competition to issues of social cohesion and personal fulfilment However despite the importance of lifelong learning there is a critical absence of direct international evidence on its extent content and outcomes *Lifelong Learning in Paid and Unpaid Work* provides a new paradigm for understanding work and learning documenting the active contribution of workers to their development and their adaptation to paid and unpaid work Empirical evidence drawn from national surveys in Canada and eight related case studies is used to explore the current learning activities of those in paid employment housework and volunteer work addressing all forms of learning including formal schooling further education courses informal training and self directed learning particularly in the context of organisational and technological change Proposing an expanded conceptual framework for investigating the relationships between learning and work the contributors offer new insights into the ways in which adult learning adapts to and helps reshape the wide contemporary world of work throughout the life course **Culture, Capitals and Graduate Futures** Ciaran Burke, 2015-08-27 In a time of too many graduates for too few jobs and in a context where applicants have similar levels of educational capital what other factors influence graduate career trajectories Based on the life history interviews of graduates and framed through a Bourdieusian sociological lens *Culture Capitals and Graduate Futures* explores the continuing role that social class as well as cultural and social capitals have on both the aspirations and expectations towards and the trajectories within the graduate labour market

Framed within the current context of increasing levels of university graduates and the falling numbers of graduate positions available in the UK labour market this book provides a critical examination of the supposedly linear and meritocratic relationship between higher education and graduate employment proposed by official discourses from government at both local and national levels Through a critical engagement with the empirical findings Culture Capitals and Graduate Futures asks important questions for the effective continuation of the widening participation agenda This timely book will be of interest to higher education professionals working within widening participation policy and higher education policy

The Way Schools Work Kathleen Bennett DeMarrais, Margaret Diane LeCompte, 1999 Provides a critical perspective on the sociology of schooling An introduction to the way sociologists think about educational processes

Sociology, Curriculum Studies and Professional Knowledge David Guile, David Lambert, Michael J. Reiss, 2017-08-07 This volume brings together an international set of contributors in education research policy and practice to respond to the influence the noted academic Professor Michael Young has had on sociology curriculum studies and professional knowledge over the past fifty years and still has on the field to this day It provides a critical analysis of his work and the uses to which it has been put in the UK and internationally discussing implications for debates on the purpose of education and how school curricula as well as programmes in other educational settings could be run and teaching undertaken based on his contribution Following Michael's long and distinguished career dating back to before Knowledge and Control New Directions for the Sociology of Education which Michael edited in 1971 recent years have seen an upsurge in both academic and policy interest in his work including the new concern he expressed for knowledge in his 2007 book Bringing Knowledge Back In The book concludes with an appreciation and a response to the authors from Michael Young and a Coda from Charmian Cannon who was on the Institute of Education panel that appointed Michael to his post in 1967 This timely book is a unique critique and celebration written by experts whose own careers have been affected by Michael and will appeal to all those with an interest in the work of Michael Young
