## **Soft Logic The Epistemic Role Of Aesthetic Criteria:**

**Soft Logic** Joseph Grünfeld, 2000 *Soft Logic* is a fascinating study that links scientific and mathematical reasoning to literature and the arts. In this work Joseph Grünfeld argues that justification by resemblance is more common in science than is generally recognized. That is, symbolic and metaphorical modes of thinking which are largely analogical often play a significant role in the interpretation of formal systems. Noting that twentieth century non-Aristotelian forms of reasoning have greatly expanded our understanding of what constitutes logic, Grünfeld explores a wide range of relevant topics including reasonableness, metaphor, deconstruction, postmodernism, aesthetics, art, and philosophy. In the process, he identifies the postmodernist implications of modern logic and develops how they may be applied to both science and art. Scholars of philosophy, aesthetics, and art will find this comprehensive and insightful work thought-provoking.

**Creative Labour** Alan McKinlay, 2009-01-29 *Creative Labour* provides an insight into the unique employment issues affecting workers in film, television, theatre, arts, music, radio, and new media. In the UK alone, more than 1 million people work in the creative industries, generating billions of pounds in exports each year. These workers have to contend with elastic working hours, employment and promotion uncertainty, and vigorous competition for each role. *Creative Labour* offers a contemporary perspective on a fascinating area of study and a rapidly growing area in developed economies. Key benefits: Grasp the realities of work behind the industry facade. Evaluate real-life case studies through a flexible critical mindset. Tailor your management decisions to the needs of creative staff.

It introduces a new version of an analytical approach to beauty that allows dissecting the whole in such a way as to make possible its synthesis and the clarification of its meaning.

*Christianity and Critical Realism* Andrew Wright, 2013-05-07 One of the key achievements of critical realism has been to expose the modernist myth of universal reason which holds that authentic knowledge claims must be objectively pure, uncontaminated by the subjectivity of local, place-specific time and particular culture. Wright aims to address the lack of any substantial and sustained engagement between critical realism and theological critical realism, with particular regard to the distinctive ontological claims of Christianity: b) their epistemic warrant and intellectual legitimacy; and c) scrutiny of the primary source of the ontological claims of Christianity, namely the historical figure of Jesus of Nazareth. As such, it functions as a prolegomena to a much-needed wider debate guided by the under-labouring services of critical realism between

Christianity and various other religious and secular worldviews This important new text will help stimulate a debate that has yet to get out of first gear This book will appeal to academics graduate and post graduate students especially but also Christian clergy ministers and informed laity and members of the general public concerned with the nature of religion and its place in contemporary society
