customer experiences trying out new business models or developing new products even the most experienced managers often get it wrong They discover that intuition experience and big data alone don't work What does Running disciplined business experiments And what if companies roll out new products or introduce new customer experiences without running these experiments They fly blind That's what Harvard Business School professor Stefan Thomke shows in this rigorously researched and eye opening book It guides you through best practices in business experimentation illustrates how these practices work at leading companies and answers some fundamental questions What makes a good experiment How do you test in online and brick and mortar businesses In B2B and B2C How do you build an experimentation culture Also best practice means running many experiments Indeed some hugely successful companies such as Amazon Booking.com and Microsoft run tens of thousands of controlled experiments annually engaging millions of users Thomke shows us how these and many other organizations prove that experimentation provides significant competitive advantage How can managers create this capability at their own companies Essential is developing an experimentation organization that prizes the science of testing and puts the discipline of experimentation at the center of its innovation process While it once took companies years to develop the tools for such large scale experiments advances in technology have put these tools at the fingertips of almost any business professional By combining the power of software and the rigor of controlled experiments today's managers can make better decisions create magical customer experiences and generate big financial returns
