development in many countries it is becoming increasingly necessary to re use previously dev oped brownfield sites and to deal with their accompanying suites of contaminants It is therefore essential to fully understand the diversity and properties of urban soils to assess the possible risks from the contaminants they contain and devise ways of cleaning up sites and or minimizing hazards The author Helmut Meuser is Professor of Soil Protection and Soil Clean up at the University of Applied Sciences Osnabr ck and is one of Europe s foremost experts on contamination from technogenic materials in urban soils He has many years experience of research in Berlin Essen Osnabr ck other regions of Germany and several other countries
