Soil and Water Management Strategies for Tidal Lowlands in Indonesia F.X. Suryadi, 1996-01-01 Irrigation Revisited Jan Kop, Wim Ravesteijn, Kasper Kop, 2016-03-21 In February 2013 a delegation of Dutch technicians working in Indonesia handed over the book For Profit and Prosperity dealing with the Dutch contribution to public works in Indonesia during the period 1800 2000 to dr ir Suyono Sosrodarsono who was Director General of Water Management 1966 1982 and Minister of Public Works 1983 1988 in Indonesia In his expression of thanks dr ir Suyono Sosrodarsono noticed that important information was missing in the book especially in the field of irrigation in modern Indonesia He suggested that Dutch participants of the irrigation projects in Indonesia since 1965 should provide the missing information by putting their memories on paper This suggestion was adopted and has resulted in the present anthology focusing on the rehabilitation and creation of a few irrigation projects with Dutch assistance during the period 1965 2014 Apart from purely technical information legal frameworks policies and programs are treated as well as systems regarding water management settlement training and education Special attention is given to the problematic nature of the West Tarum Canal and to Indonesia s unique tidal and non tidal swamp development The anthology derives its authenticity from the fact that the authors of the various chapters actually participated in the field

Management of Irrigation and Drainage Systems Hector M. Malano, Paul van Hofwegen, 2018-05-02 This monograph provides an overview of the principles required for a service orientation in the management of irrigation and drainage systems The material covered is designed to emphasize an area largely neglected in the irrigation and drainage management literature The dominating philosophy underlying this book is that irrigation and drainage systems must be

managed as a service business responsive to the needs and changing requirements of its customers It is postulated that this service approach to the management of irrigation and drainage systems constitutes a key element of the strategy that is needed to improve the current level of performance of many irrigation and drainage systems worldwide Enhanced performance of irrigation is a prerequisite if we are to face the enormous challenge of producing greater quantities of food to meet the demand of a growing population This is particularly the case in an environment with increasing competition for water from industry and urban water users set against mounting concerns about environmental sustainability *Agency and Change* Raymond Caldwell, 2006-04-27 This excellent book remaps the limits and possibilities of change clearly shifting the focus from outmoded debates on agency and structure to new practice based discourses on agency and change Offering readers a selective and critical review of key literature and empirical research it will help students contextualize this complex subject area and independently evaluate future prospects for effective change agent roles in organizations Presenting an interdisciplinary exploration of competing discourses the book uses two overarching conceptual continua centred agency decentred agency and systems processes thereby allowing a more intensive focus on agency and change Well written with challenging content this book is essential reading for those interested in the origins development and future prospects for change agency in an organizational world characterized by increasing complexity risk and uncertainty *Soils and Fertilizers* ,1997-07 *Adaptation of Plants to Waterlogging and Hypoxia* Najeeb Ullah, Silvia Pampana, Waqar Ahmad , Daniel Kean Yuen Tan, 2024-06-03 Plants like other living organisms require oxygen and water supplies for sustaining their normal growth and development The water requirement is generally met through a coordinated system of root to shoot communication However excessive soil moisture in the rhizosphere can impact normal functioning of plants by restricting oxygen supplies to the roots To survive under hypoxic conditions plants show cellular molecular and functional level adaptations One temporary response could be switching to anaerobic respiration and maintain energy production to some extent via glycolysis and ethanol fermentation However root respiration water and nutrient uptake and hormonal synthesis are severely impacted under sustained periods of oxygen deficiency These belowground changes in turn affect shoot performance and yield formation by interfering with the key physiological processes **Bibliography of Southeast Asia** Kim See Ch'ng, 2003 The Bibliography of Southeast Asia A Decade of Selected Social Science Publications in the English Language 1990 2000 comprises 6 521 entries of published works The selection broadly represents the documentation of the political economic and social and cultural processes of one of the most interesting eras of the previous millennium **International Books in Print** ,1987 Proceedings of the International Conference on Agriculture, Food, and Environment (ICAFE 2024) Budiarto Budiarto, Tuti Setyaningrum, Mohammad Nurcholis, Raden Agus Widodo, Liana Fatma Leslie Pratiwi, Maftuh Kafiya, Ali Hasyim Al Rosyid, Danar Wicaksono, Mochammad Tanzil Multazam, Partoyo Partoyo, Graciela L. Caballero, 2025-09-29 This is an open access book As our global population continues to expand the demand for food

surges alongside it placing unprecedented pressure on our agricultural systems However this growth comes at a cost to our planet as unsustainable farming practices contribute to environmental degradation soil erosion water scarcity and biodiversity loss which also affect the socio economic aspects of farmers The urgency to find sustainable solutions has never been more paramount Under the overarching theme of sustainable agriculture practices this conference is a pivotal platform for international collaboration knowledge exchange and innovation Over the course of our deliberations we will explore multifaceted strategies aimed at harmonizing agricultural production with environmental preservation to ensure a resilient and equitable food future for generations to come We will examine the latest advancements in Agricultural Sciences and Engineering Soil and Water Management Food Science and Technology Agricultural Environment Ecology and Resources Agricultural Socio Economics and Smart Technologies in Agricultural Systems through keynote addresses panel discussions and research presentations By fostering dialogue among researchers We aspire to catalyze actionable initiatives that promote sustainable agricultural development globally Once again we extend our warmest welcome to all participants and express our gratitude for your dedication to the noble cause of advancing sustainable agriculture practices Together let us chart a course toward a more prosperous resilient and sustainable future for agriculture and food security worldwide
