The Sacred Feminine Through The Ages Paula Marvelly, 2024-06-11 Explore feminine spirituality from the beginning of recorded history to the present day through the works of 23 extraordinary women. These extraordinary women have expressed their experiences of the agony and ecstasy of pursuing spiritual enlightenment through their poetry and prose, which is beautiful, inspirational, and very moving. In this completely revised and updated edition of *Women of Wisdom*, Paula Marvelly has selected powerful and evocative words from an array of female voices of widely differing ages, faiths, and ethnicities: Jewish, Christian, Sufi, Hindu, Buddhist, Taoist, Platonic, revealing the common and overriding theme between them, which can be expressed as non-duality, the experience of losing one's individuality and becoming one with the universe. The audiobook is narrated by award-winning British actor Polly Lee. Whether you are interested in reviving lost and misunderstood women of history or you are looking to find new ways to understand the many ancient questions that generations before us have been asking, you will discover a wealth of wisdom and inspiration from these women of wisdom. Read the musings of the ancient priestess Enheduanna on her beloved goddess of the moon. Decode ancient Egyptian inscriptions to reveal Hatshepsut, a powerful female pharaoh whose rule was almost deleted from history. Revel in the immortal beauty of Sappho's poetry on the divine bounty of Mother Nature. Emily Dickinson's words on love or Virginia Woolf's prose on female expression. Uncover the cosmic life force with polymath Hildegard of Bingen. Dwell on the revelations of divine love with anchoress Julian of Norwich and so much more.

Opening the Ark of the Covenant Frank Joseph, Laura Beaudoin, 2007-01-26 Through his worldwide research into its disappearance, author Frank Joseph has learned that the Ark was not a mere legend nor was it just an elaborate box used to store the original Ten Commandments. It was, he asserts, purpose-built to harness the powers of the Earth for humanity's continued physical existence and spiritual evolutions.

Into the Rabbit Hole Michael Warren, 2005-10 Ronald Reagan once said, "If anyone is afraid to stand up to clients, the government, and employers, teachers, or virtually any authority, then know that all you are doing is feeding the crocodile, hoping that he will eat you last." *Into The Rabbit Hole* takes you on a journey into the state of your own mind and the mind of the beast that has deceived you. Going in the hole, your path will cross with the entities that you have trusted to guide your life. Religious deception, sacred bloodlines, the cult mind, secret societies, government deception, and our true origins as a species are recurring themes. It is time that society awakens to the truth of their real existence and how they can escape from the hole. *Into The Rabbit Hole* is your first step into the true reality you seek. An

explores how these miraculous fossils have transformed the contentious arena of bird and dinosaur evolution. Aside from being the most comprehensive discussion of these avian and associated discoveries, the author delves into the world of investigative journalism to expose the darker side of the world of fossil birds and dinosaurs. The book exposes the massive unfounded speculation that has characterized the field of vertebrate paleontology and published extensively in the world's most prestigious journals, including everything from supposed dinosaur protein to so-called feathered dinosaurs. The book questions the validity of the foundational tenets of the now unquestionable orthodoxy of bird and dinosaur evolution, including bird origins, feathered dinosaurs, flight origin from the ground up, and hot-blooded dinosaurs and their proteins. It exposes how speculation has gone far beyond the ability of the currently available evidence to yield answers. The author concludes that birds are best defined by a more traditional definition of the possession of feathers and avian flight architecture, that the so-called feathered dinosaurs are most likely derived avians, and that flight clearly originated from the trees, down from ancestors that antedated the dinosaurs rather than a direct linear descent.

Uncommon Knowledge Al McDowell, 2012-10-26. This book develops new science of gravity and light based on the century-old Le Sage theory of an ether that was replaced by Einstein's Theory of Relativity. After presenting astrophysical data contradicting the theory that the universe is expanding from a Big Bang, experiments believed to prove Relativity are shown to actually prove the ether theory instead. Freedom from the speed limit of light enables a science of subatomic particles traveling faster than light to produce gravity, electric and magnetic fields, light, and radio waves. Major technical innovations include solving the two fundamental problems with the Le Sage gravity theory and extending this theory to electromagnetism and consciousness. This is a theory of everything that explains the heretofore unknown causes of the forces of nature. This book builds on the works of Zecharia Sitchin and other authors to explain how life developed on Earth and that evolution requires direction from intelligence that dwells in the subatomic particles on which this theory of gravity and light is based. Our biblical God is shown to be a composite of Sitchin's extraterrestrial gods who colonized Earth and the intelligence that dwells alongside our own mind in the particles from which the universe is constructed and powered.
