Sociology Of The Twenty First Century Continuities And Cutting Edges:

Sociology for the Twenty-first Century Janet L. Abu-Lughod, 1999 These original essays by eminent sociologists probe issues of central importance to North American societies in the twenty first century The chapters in part 1 revise theory and methods to comprehend the economic and political institutions that increasingly dominate the lives of individuals and groups arguing that these giants must be made more democratically accountable Part 2 explores the social effects that growing globalization transnationalization and information technologies are having on politics economics and the environment The final chapters compare how new immigrants from increasingly diversified backgrounds are being absorbed in Canada and the United States exploring the impact that immigrants are having on preexisting ethnic minorities and on the dominant political culture While it is a major attempt to refocus the discipline of sociology the book s clear nontechnical style and its attention to issues of central concern to all citizens make it also highly accessible to nonspecialists Contributors are Janet L. The Moralization of the Markets Christoph Henning, 2017-07-12 Nothing affects the modern economy and society more than decisions made in the market place especially but not only decisions made by consumers Although it is not startling to suggest that decisions made in production are affected by choices consumers make consumers have long been viewed not only by academic economists as individual isolated rational actors that make or refrain from purchases purely on the basis of narrow financial considerations Markets are not and never were morally neutral Market relations have always had an often taken for granted moral underpinning The moralization of the markets refers to the dissolution and replacement

of the conventional moral underpinnings of market conduct for example in the music market financial markets and corporate governance It further implies not only the heightened importance of new ethical precepts but the significant change in the role of moral ideals in market behavior These profound transformations of economic conduct are accompanied and co determined by societal conflicts The moralization of markets represents thus a new stage in the social evolution of markets The book is divided into four parts in which the twelve chapters written by contributors from different social science disciplines deal with the context of the moralization of the markets the major social institutions and present case studies that examine European and American attitudes and behavior towards tobacco and GMO expansion of the private and ethics in business and how workers respond to the new corporate norms This volume will be of interest to sociologists economists social scientists and the general consumer alike

The Dialogical Turn Charles Camic,Hans Joas,2003-12-09 The discipline of sociology was born and has been recurrently reconstituted in response to the fragmentation of ideas about the social world For two centuries sociologists have sought refuge in synthesis programs designed to integrate multiple perspectives within a unifying framework Yet even as this cause has inspired many of the discipline s major thinkers past and present its objective has proven elusive leaving nearly as many syntheses as synthesizers

This volume considers an alternative response that has recently developed within sociology to the crisis of intellectual fragmentation the dialogical turn Rather than decry the multiplicity of social theories research methods and results this response welcomes a plurality of orientations and approaches as the essential basis for establishing and maintaining productive dialogue Examining this exciting development The Dialogical Turn builds on the ideas of Donald N Levine whose extensive writings on the forms and functions of intellectual dialogue provide the point of departure for twelve original essays Written by an internationally renowned group of scholars these innovative chapters explore the dialogical possibilities for sociology both constructively and critically The contributors assess the role of sociology in the conversation across contemporary academic disciplines exploring the fundamental structural and conceptual reconstructions now taking place in sociology and neighboring fields

Faith Seeking Action Gregory P. Leffel, 2007-06-01 In Faith Seeking Action author Gregory Leffel links a description of the church as a global movement with a description of contemporary social movements that are actively challenging today s societies such as the environmental global justice and identity movements Not surprisingly Christian communities and communities of social activists share much in common as they each work to enrich their societies It is natural then to ask

what missionally concerned Christians may learn from social movements about the public role of their churches the connection of their beliefs to social change and the mobilization of their people It can also be asked how these often divided communities may find ways to collaborate around common actions rooted in such shared values as peace justice life and the integrity of the environment Building on growing interest in the field of missiology and its missional church concept Leffel has created a dialog between the church as a social actor and social movements Along with introducing movement theory to mission studies Leffel introduces a new way of addressing the issues involved in the church s engagement with society a concept he calls *missio ecclesiology* Of interest to those seeking vital ways to live out their faith in the world missiologists missional church leaders and street level workers alike this work fuels fresh thinking about the church s role in cultural and social change
