AN INTRODUCTORY GUIDE TO PUTTING RESEARCH INTO PRACTICE
4. Finding new evidence — research design

Alan Borthwick, Lisa Farndon and Jackie Campbell

Conventionally, designs for research studies are divided into two categories: quantitative and qualitative. As will be seen later, the research design used should follow from the research question and ensure that data are collected and analysed in a way that will answer that question. However, the form that the research question takes is largely a function of underlying philosophy and of why the question is being asked in the first place.

This article examines the main types of philosophical research stances as these underpin the resulting research methodologies. The main characteristics of quantitative and qualitative designs are outlined and, finally, some of the main research designs are described.

RESEARCH PHILOSOPHIES
The main models of enquiry used are the positivist and the interpretative models.

The positivist model:
- The natural science model
- Based on testing theories and hypotheses
- Insists on objectivity and neutrality – avoidance of personal bias
- Researcher controls the theoretical framework, sampling frames and the structure of the research
- Theory/concepts developed before data collection- seeks to falsify the initial hypothesis
- Favours quantitative methods

The interpretative model
- Has its roots in philosophy, history, anthropology etc
- Approach centres on interpretation and creation of meaning by human beings
- Accepts subjective reality
- Looks at understanding rather than explanation
- Context is crucial
- Researchers are reflexive, not objective – favours qualitative methods

QUANTITATIVE VS QUALITATIVE DESIGNS
The investigation of new knowledge can be approached in many ways. The approach taken depends on the nature and type of the research problem and the philosophical stance of the researcher (amongst other things). The most important thing, however, is that the methods should be chosen to answer the research question.

There is also a link between research designs and analytical methods. Future articles in this series will focus on

C. M. Ran,Frank van der Linden,2000 Software development organizations are now discovering the efficiencies that can be achieved by architecting entire software product families together In Software Architecture for Product Families experts from one of the world s most advanced software domain engineering projects share in depth insights about the techniques that work and those that don t The book offers a solutions oriented case study approach covering the entire development lifecycle based on advanced work done by three of Europe s leading technology companies and their academic partners Discover the challenges that drive companies to consider architecting product families and the new problems they encounter in doing so Master concepts and terms that can be used to describe the architecture of a product family then learn how to assess that architecture and transform it into working applications The authors also present chapter length real world case studies of domain engineering projects at Nokia Philips and ABB *Software Product Lines* Gary J. Chastek,2003-08-02 Software product lines are emerging as an important new paradigm for so ware development Product lines are enabling organizations to achieve impressive time to market gains and cost reductions In 1997 we at the Software Engine ing Institute SEI launched a Product Line Practice Initiative Our vision was that product line development would be a low risk high return proposition for the entire software engineering community It was our hope from the beginning that there would eventually be su cient interest to hold a conference The First Software Product Line Conference SPLC1 was the realization of that hope Since SPLC1 we have seen a growing interest in software product lines Companies are launching their own software product line initiatives product line technical and business practices are maturing product line tool vendors are emerging and books on product lines are being published Motivated by the enthusiastic response to SPLC1 and the increasing number of software product lines and product line researchers and practitioners the SEI is proud to sponsor this second conference dedicated to software product lines We were grati ed by the submissions to SPLC2 from all parts of the globe from government and commercial organizations From these submissions we were able to assemble a rich and varied conference program with unique opportunities for software product line novices experts and those in between This collection represents the papers selected from that response and includes research and experience reports *Working IEEE/IFIP Conference on Software Arhitecture* Rick Kazman,2001 The proceedings from the August 2001 conference in Amsterdam contain the abstracts of two

   Software Product Line Abdelrahman Elfaki,2012-04-04 The Software Product Line SPL is an emerging methodology for developing software products Currently there are two hot issues in the SPL modelling and the analysis of the SPL Variability modelling techniques have been developed to assist engineers in dealing with the complications of variability management The principal goal of modelling variability techniques is to configure a successful software product by managing variability in domain engineering In other words a good method for modelling variability is a prerequisite for a successful SPL On the other hand analysis of the SPL aids the extraction of useful information from the SPL and provides a control and planning strategy mechanism for engineers or experts In addition the analysis of the SPL provides a clear view for users Moreover it ensures the accuracy of the SPL This book presents new techniques for modelling and new methods for SPL analysis

research institutes and universities executed the EUREKA ITEA projects ESAPS CAF and FAMILIES on the topic of product line engineering The projects originated from the need of the industry to improve software engineering performance by organizing product development in product lines The results obtained within the projects have been implemented in several large industries e g automotive e business medical systems and mobile phones They involve a radical shift in software construction and production The most important research results of the projects are collected in this book Product line engineering was already applied within industry in the 1980s and presumably earlier In the 1980s good architects in many telecommunications c panies based their architectures on the ideas of David Parnas who published on the subject of program families They were facilitated by the CHILL language widely used by the telecommunications companies This language deploys the same modularity principles as the Modula programming language family Modularity is a crucial ingredient for implementing systems with a component based architecture Being able to compose the products of components is an important mechanism in all product line architectures In the 1990s the product line ideas started to gain ground in other industries Around 1995 the company experiences reached the academia and since then people in companies and academia have collaborated widely on this subject The ESAPS CAF and FAMILIES projects manifest an institutionalized form of this collaboration   **American Book Publishing Record** ,2000-07   **Software Architecture** Flavio Oquendo,2007-09-11 This book constitutes the refereed proceedings of the First European Conference on Software Architecture ECSA 2007 held in Aranjuez Spain The 12 revised long papers presented together with four short papers cover description languages and metamodels architecture based code generation run time monitoring requirements engineering service oriented architectures aspect oriented software architectures ontology based approaches autonomic systems middleware and web services   **Software Product Lines: Going Beyond** Jan Bosch,Jaejoon Lee,2010 This volume constitutes the refereed proceedings of the 14th International Software Product Line Conference SPLC 2010 held on Jeju Island South Korea in September 2010   Model-Based Product Line Engineering (MBPLE) Marco Forlingieri,Tim Weilkiens,Hugo Guillermo Chalé-Gongora,2025-04-29 Clear and concise guide to MBPLE with industrial case studies Written in a to the point style Model Based Product Line Engineering MBPLE is the only theoretical and practical foundational book on MBPLE that brings together the topics of model based systems engineering MBSE and feature based product line engineering PLE It examines how PLE can benefit from a model based and model centric approach and in turn how MBSE combined with holistic PLE can boost model reuse and improve the MBSE business case The book combines both management and engineering aspects to deliver comprehensive coverage of the subject The book covers real life challenges and implementations of MBPLE discussing adoption obstacles faced by engineering organizations and how to overcome them to ensure a successful MBPLE deployment Dozens of SysML v2 views SysML v1 diagrams SysML v2 code snippets and illustrations are included throughout to elucidate key concepts Additional supplementary learning materials are available on a companion website Written by a
