community to unify and coordinate its effort to advance the state of practice and research WICSA 1 was organized to facilitate information exchange between practising software architects and software architecture researchers The conference was held in San Antonio Texas USA from February 22nd to February 24th 1999 it was the initiating event for the new IFIP TC 2 Working Group on Software Architecture This proceedings document contains the papers accepted for the conference The papers in this volume comprise both experience reports and technical papers The proceedings reflect the structure of the conference and are divided into six sections corresponding to the working groups established for the conference

Formal Foundations for Software Engineering Methods Heinrich Hußmann,1997-09-23 In this book Hussmann builds a bridge between the pragmatic methods for the design of information systems and the formal mathematical background Firstly the principal feasibility of an integration of the different methods is demonstrated Secondly the formalism is used as a systematic semantic analysis of the concepts in SSADM a British standard structured software engineering method Thirdly a way of obtaining a hybrid formal pragmatic specification using a combination of SSADM notations and formal SPECTRUM specifications is shown This well written book encourages scientists and software engineers to apply formal methods to practical software development problems **Foundations of Software Science and Computation Structures** M. Nivat,1998-03-11 This book constitutes the refereed proceedings of the First International Conference on the Foundations of Software Science and Computation Structures FoSSaCS 98 held as part of the Joint European Conferences on Theory and Practice of Software ETAPS 98 in Lisbon Portugal in March April 1998 The 19 revised full papers presented in the book were carefully selected from a total of 44 submissions Among the topics covered are formal specification automata theory term rewriting and rewriting systems process algebras formal language theory type theory event structures and iteration theory **Advanced Information Systems Engineering** Matthias Jarke,Andreas Oberweis,2003-05-21 This book constitutes the refereed proceedings of the 11th International Conference on Advanced Information Systems Engineering CAiSE 99 held in Heidelberg Germany in June 1999 The 27 revised full papers presented together with 12 short research papers and two invited contributions were carefully selected from a total of 168 submissions The papers are organized in topical sections on components information systems management method engineering data warehouses process modeling CORBA and distributed information systems workflow systems heterogeneous databases and information systems dynamics
