Soil Pollution Ibrahim Mirsal, 2008-10-26 Despite having been published about two years ago for the first time the continuous demand for this book encouraged me to prepare this revised and enlarged edition Many parts of the text have been rewritten type errors traced and corrected and the bibliography largely modified to include many of the references published about the subject of soil pollution in the previous ten years I should like to express my thanks to the staff of Springer Verlag Heidelberg for their cooperative efforts in preparing this edition I also would like to thank Mr Michael Sidwell B A for the extreme but characteristic care with which he read and revised the proofs I hope that in this new edition the book may continue to serve the needs of students and professionals alike interested in the subject of soil pollution

Ibrahim A Mirsal Preface to the First Edition Whoever has enjoyed following the legendary duel between the Egyptian Pharaoh and his magicians Alchemists on one side and Moses and his brother Aaron on the other as is vividly narrated in the Bible must have realised that people at least those living at or near the eternal battlefields of the Middle East have always had knowledge about the terrible consequences of soil pollution by chemicals This knowledge must have existed long before Moses and his Pharaoh Nobody knows when people became aware of this yet it must have been born in very early times reaching back to the dawn of human consciousness

Soil Pollution: Origin, Monitoring and Remediation Sebastian Brown, 2021-11-16 The degradation of soil by an alteration in the natural soil environment or through the presence of xenobiotic chemicals is known as soil pollution It is usually caused by improper disposal of waste agricultural chemicals and industrial activity Some of the prominent chemicals which cause soil pollution are petroleum hydrocarbons naphthalene solvents pesticides and heavy metals such as lead The process of removing pollutants and contaminants from the soil is known as environmental remediation There are various strategies which are used in remediation Some of these are aeration of soils bioremediation extracting groundwater and then filtering the contaminants phytoremediation and surfactant leaching The topics covered in this extensive book deal with the core aspects of soil pollution as well as its monitoring and remediation It will serve as a reference to a broad spectrum of readers Coherent flow of topics student friendly language and extensive use of examples make this book an invaluable source of knowledge
